XL SERIES

T&C – HDPE Plaster Interceptors

Specification: T&C Plastics Series ____ HDPE rotational molded plaster interceptor with solids holding capacity of ____ (indicate). Unit shall include: 3/8" uniform wall thickness, plaster retention baffle with elevated 3" diameter passageway, adjustable lid system, sample port access and 4" no hub inlet and outlet connections. Steel encased composite lid provides a water / gas tight seal and has a minimum of 20,000 lbs. load capacity. The lid is designed in accordance with the loading requirements of AASHTO H20.

Function: Plaster interceptors are required anywhere that solids may be introduced into the public sewer system in applications such as: barber shops, dentist offices, salons, artist studios, laundry facilities, machine shops, food waste, parking lots, car washes, food processing, livestock and agricultural drainage. These wastes must be separated before entering the sewer system. The plaster interceptor will filter out plaster and sediment from the fixture waste line before entering the pipe system to reduce clogging and improve performance. Typically installed either on or into the floor. Narrow width permits access through doorways and down stairwells. High Density Polyethylene construction ensures a lightweight installation process (two people can move and install it). Regular maintenance is required to keep the interceptor functioning. All T&C interceptors can withstand a temperature of up to and including 180 degrees Fahrenheit.

	Model No.	LIQUID CAP. (Gallons / Cu. Ft.)	SOLIDS CAP. (Gallons / Cu. Ft.)	B Width	Shipping Weight (Lbs.)
	PLS-XL-50	55 / 7.19	28 / 4	28.00"	92
	PLS-XL-75	140 / 18.30	70 / 9	33.50"	165
	PLS-XL-100	300 / 39.21	150 / 20	33.50"	290

OPTIONAL VARIATIONS

Anchor kit for XL Series

Lid Extension - up to 44" high - for XL Series

Lid Extension - up to 72" high - for XL Series

6" no hub inlet and outlet - for each piece (Two pieces required)

High level alarm and float switch (to be installed on site)

Remote pump out kit (also includes Remote Pump Out (-RPO))

3" Remote pump outlet connections on top of interceptor - specify location and number required

External sampling port - inline, high connections

External sampling port - inline, low connections

External sampling port - offset
