

Protect Your Investment

From personnel changes to hectic production conditions and demands, Gosiger understands that priorities and personnel availability can change. We are here to help! Gosiger provides training and PM services to keep your machine running to the best of its ability. Our visits may also help us identify and fix issues before they negatively impact performance and workflow.

Other Services Offered

Off-Site Training

Gosiger conducts periodic training sessions at our facility in Dayton OH. This is a 2-day, hands-on training program using a powered iFP washer. Contact Gosiger for a current schedule and availability, or a personalized program.

Remote Service

All iFP washers come equipped with convenient and efficient remote service assistance. Please make certain you are connected to take advantage of this service. Contact our service team if you need help with the remote connection.

24-Hour Technical Service

A HEALTHY MACHINE — IS A — HAPPY MACHINE

iFP POST WARRANTY PREVENTATIVE MAINTENANCE PROGRAM

iFP CLEAN + **GOSIGER**
SERIOUS SOLUTIONS

HOW WELL DO YOU KNOW YOUR IFP?

We provide industrial parts washers featuring continuous solvent recycling, particle filtration, oil separation, water separation, vacuum drying and much more. Our Preventative Maintenance Plan makes sure your machine remains operational and decreases the risk of downtime.

MAKING THE MOST OF YOUR INVESTMENT

There are many processes that allow your iFP to function correctly. Through our preventative maintenance plan, we touch on all these processes and provide the service to keep your machine running longer.

DO I NEED PREVENTATIVE MAINTENANCE?

We want to make sure every part coming out of the washer is true to our standard "iFP Clean". Preventative maintenance is what allows the washer to perform as designed and creates consistency with each part the machine produces, providing a clean finish every time.

PRE-VISIT

Prior to the first on-site preventative maintenance service, our technical service supervisor will call you to conduct a virtual assessment of your washer's current condition and discuss any existing problems as well as past preventative maintenances.

FIRST ON-SITE VISIT

Gosiger experts will cover all PMs that would be completed in both semi-annual and annual visits. We will train your team on the proper procedures to conduct and record the daily, weekly and monthly PMs prior to our semi-annual on-site visit.

*NOTE: Gosiger may identify other corrective repairs which may be recommended.

VIRTUAL FOLLOW-UP

3 months after the on-site PM, we will conduct a virtual follow-up with your team to assist with any questions or issues you may have.

ON-SITE SEMI-ANNUAL PM

Change Carbon In Carbon Filter Barrel
Vacuum Check on (A Valve)
Vacuum Check on Boiler
Seal Check On Filter (F Valves)
Vacuum Check on Filter (T Valves)
Vacuum Check on (Q Valve / Vane Pump)

Change Oil in the Solvent Transfer Pump
Change Oil in the Roots Pump
