

Professional Learning with WeVideo

WeVideo is here to help accelerate your digital transformation initiatives, promote student-centered learning and build capacity for digital storytelling across all subject areas.

Our professional learning workshops are designed to support the successful implementation of WeVideo based on your district goals. Options range from custom on-site workshops to live webinars for teachers and coaches.

Recommended topics

WeVideo 101 for Teachers

In this introductory workshop, teachers learn the foundations they need for a successful start with WeVideo. We will touch on basic set-up before giving teachers a primer on video editing skills and how to introduce students to WeVideo. Teachers will learn strategies for weaving multimedia creation into their daily lessons, including how to create and give feedback on assignments.

WeVideo 101 for Admins

This workshop is built to support administrators with setting up and effectively deploying WeVideo to teachers and students. We will cover the essentials of managing your WeVideo licenses, including user roles and profiles, privacy settings, integrations and domain sync workflows, central content management and organization-level groups.

Advanced WeVideo Editing

Level up your WeVideo implementation with this in-depth workshop on the principles of multi-track editing. Teachers will take a deep dive into advanced tools like chroma key, screencasting, animation, speed control, and audio and video automation.
