

The State of Data Loss Prevention in Financial Services

Data Loss Prevention (DLP) is a top priority for IT, security, and compliance leaders in the Financial sector. But our latest research report, [The State of Data Loss Prevention 2020](#), shows that **data loss on email is a bigger problem than most realize**. This includes both accidental data loss and deliberate data exfiltration.

To combat human error on email, many firms trust Tessian's Next-Gen DLP solutions. Learn why.

TRUSTED BY GLOBAL-LEADING FINANCIAL INSTITUTIONS:

EVERCORE

BDO

PRUDENTIAL

Investec

affirm

Schroders

BainCapital

Jefferies

GOCARDLESS

JTC

KEY INSIGHTS:

“If security software or policies make it difficult or prevent me from doing my job, I will find a work around.”

The data Tessian protects:

- Bank Account Numbers
- Loan Account Numbers
- Credit/Debit Card Numbers
- Social Security Numbers
- M&A Data

Compliance standards Tessian helps satisfy:

- GLBA
- COPPA
- FACTA
- FDIC 370
- CCPA
- GDPR
- HIPAA

“Security products should only be seen when there is a security issue, while also playing a role in better educating users about security risks. With Tessian, we can be confident that employees won’t see notifications unless it really matters.”

ARA MARGOSSIAN

Technology and Security Strategy Partner, Webb Henderson

The majority of employees working in Financial Services have either accidentally or internally exfiltrated data. This includes sending misdirected emails and emailing company data to personal email accounts.

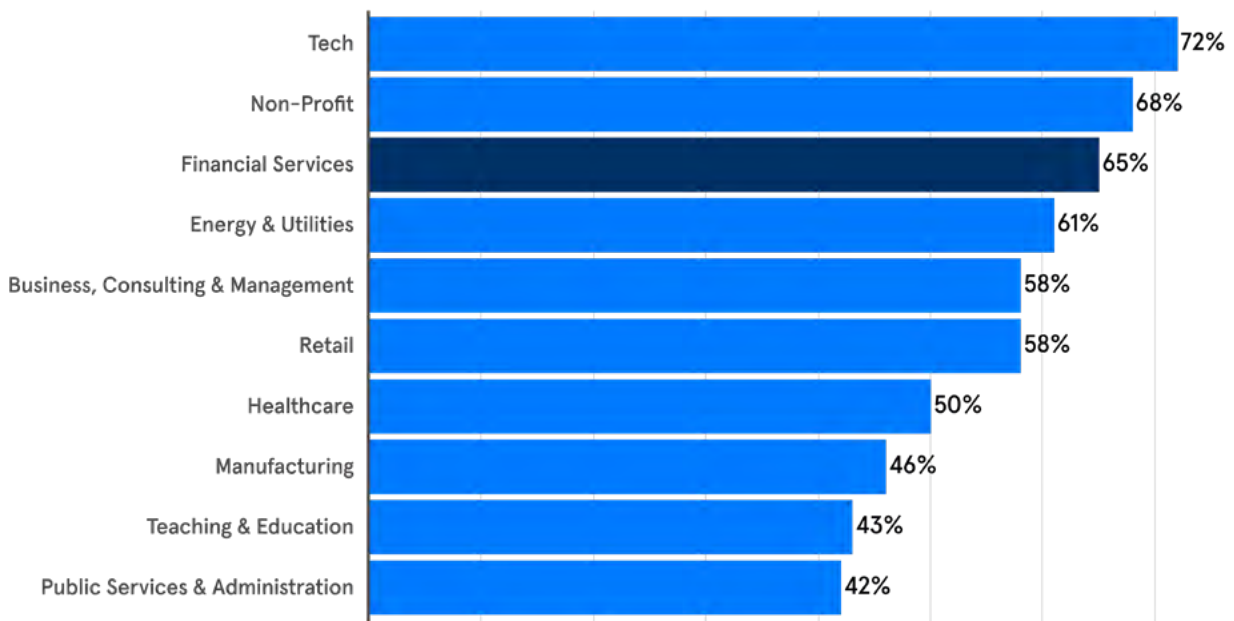

PERCENTAGE OF FINANCIAL SERVICES PROFESSIONALS WHO ADMIT TO SENDING MISDIRECTED EMAILS

PERCENTAGE OF FINANCIAL SERVICES PROFESSIONALS WHO ADMIT TO SENDING UNAUTHORIZED EMAILS

“From an information security perspective, I feel less secure working from home than I do in my office environment.”

"I have downloaded, saved, or sent work-related documents to personal accounts before leaving or being dismissed from a job."

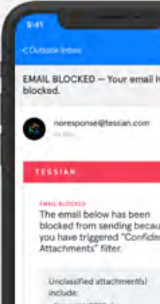

"For the first time ever, we now have visibility and control over inadvertent data loss through misaddressed emails and information being sent to unauthorized email accounts, two key information security risks for our business."

NEIL WELLARD

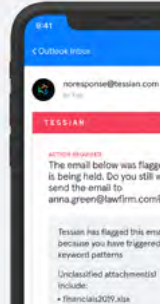

Former Head of Information Security at Man Group

Human Layer Security
TESSIAN.COM

Tessian's mission is to secure the human layer. Using machine learning technology, Tessian automatically stops data breaches and security threats caused by human error - like data exfiltration, accidental data loss, business email compromise and phishing attacks - with minimal disruption to employees' workflow. As a result, employees are empowered to do their best work, without security getting in their way. Founded in 2013, Tessian is backed by renowned investors like Sequoia, Accel, March Capital, and Balderton.
