

An easy way to make functional look modern.

## DÉCOR

# BANKING AND FINANCE

### Privacy and Security Window Films

3M Safety Window Film and their series of Safety & Security Films can do more for you than just brighten up a space. Safety Window Film was developed by 3M to prevent glass from shattering upon impact, giving protection that you can count on. Whether you decide to print on the film or use it purely for the safety aspect, it is versatile enough to meet your needs.

Privacy screens can be a creative barrier that is a functional and modern design addition to any space. From opaque or solid, images or graphic designs, privacy screens can give your space the separation it needs while still keeping an open concept layout.
