

A DIFFERENT APPROACH TO LOCKS & KEYS

INSTAKEY KEYCONTROL® VS. TRADITIONAL KEY CONTROL

Change the locks yourself, immediately.

Pay top dollar to wait for a locksmith to change the locks.

Get Restricted Keys back, reissue them to another key holder, without rekeying.

Get keys back or don't, either way you will have to call a locksmith to rekey because who knows if there's a copy out there.

Buy a new key system and get partnership, support, and training, for the life of the system.

Buy a new key system from a manufacturer and never hear from them again.

Easily keep track of who has what keys and what they access. Manage, audit and control from one cloud-based platform.

Keep track of who has a key based on the honor system. Manage this on spreadsheets or log books that one person can access.

A different approach to locks & keys will help you save time, money & create a more secure environment.
