

Development: Firmware Update

Firmware update API:

- Standardized firmware push-to-devices
- Easy-to-use API and callbacks
- 5 lines of code to create a LwM2M compliant firmware update
- Easily integrable with your device specific upgrade system

```
iowa_init()
iowa_client_configure("ClientName")
iowa_client_add_server ("ServerURI")
iowa_client_firmware_update_configure(
    downloadCallback,
    writeCallback,
    updateCallback);

LOOP
    iowa_step()
END LOOP
iowa_close()
```

"Our development team was able to port our existing NB-IoT solution onto IoTerop's IOWA with just a few lines of code"--Daniel Åkesson, COO, Elvaco
