

**CLEAN HANDS
PARTNERSHIP**

Keeping hands clean is our business.

Our Mission

Clean Hands Partners was founded by three food & beverage veterans with the goal of providing quality driven solutions for businesses looking to solve their hand sanitizer needs. Our core values are centered around developing strong partnerships with our customers so we can enable the best possible outcomes for both your company and customers

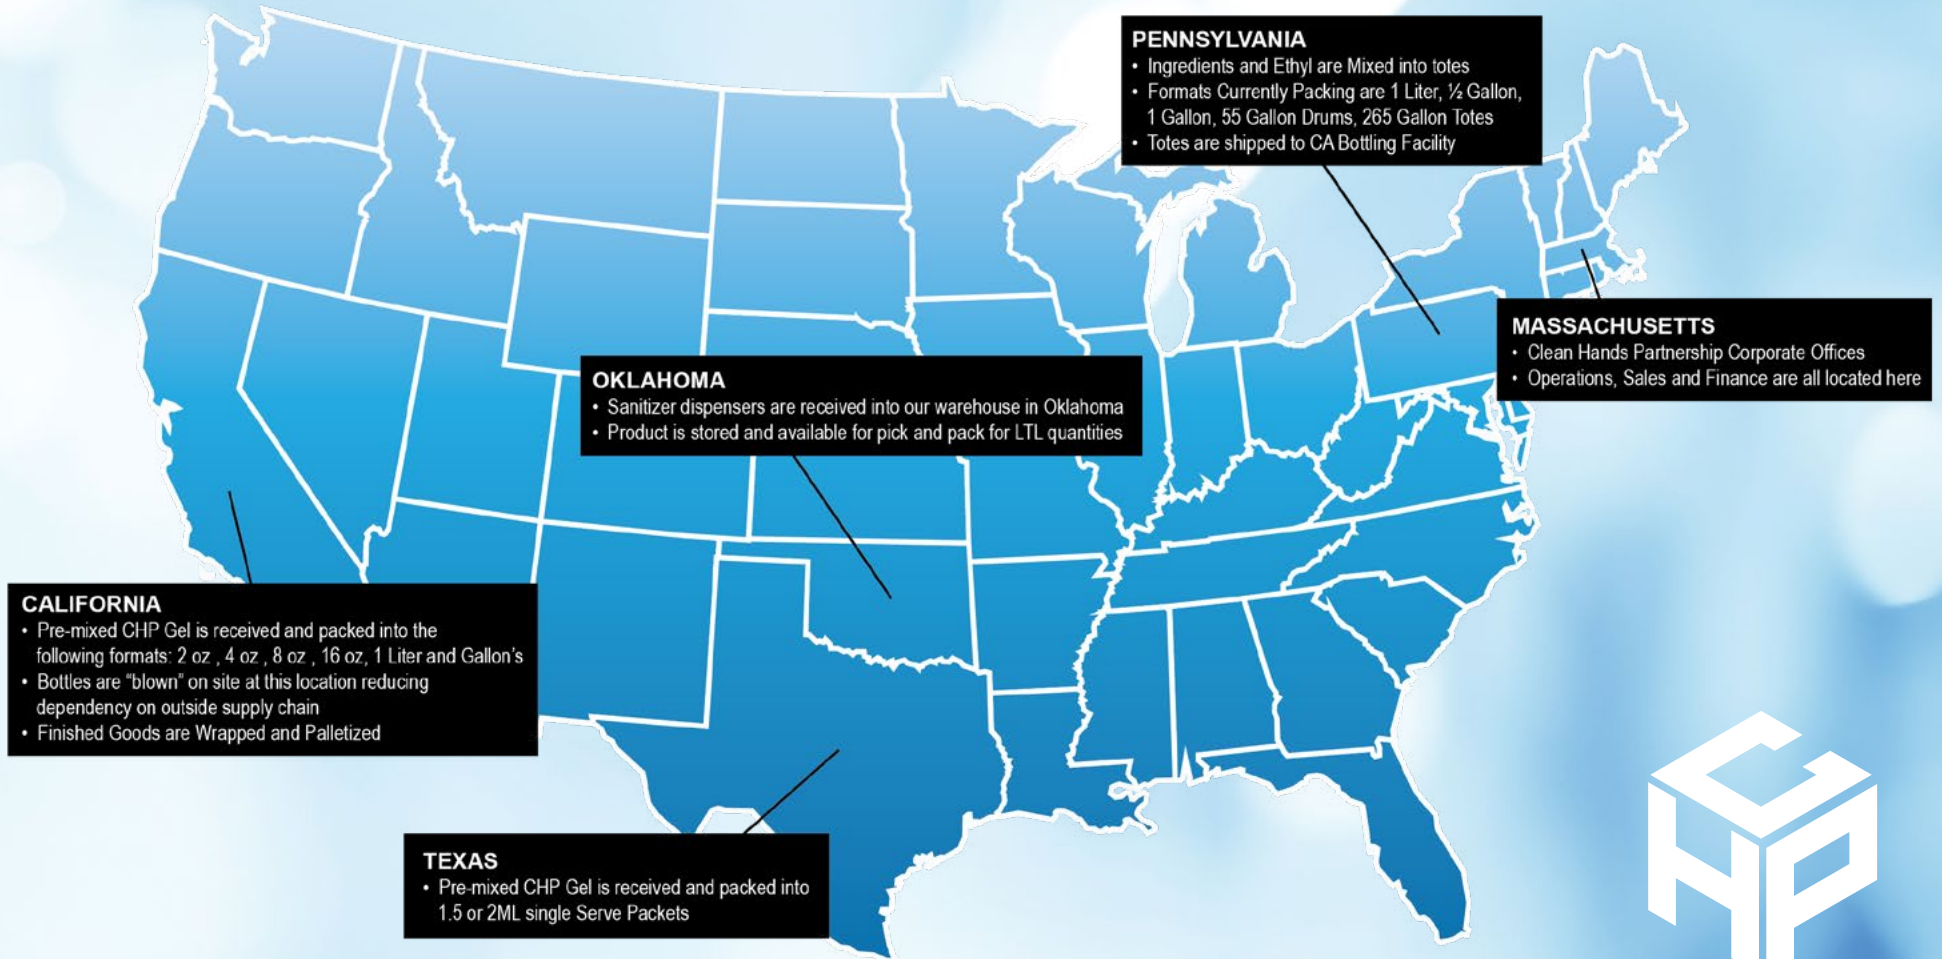

Fighting COVID-19 is all our responsibility, that's why our team immediately joined the fight and started working with our manufacturing partners to produce FDA & NDC registered and WHO Guideline adhering hand sanitizer products.

Since quality is always our top priority for any customer, we used the same due-diligence that we would for any of our food & beverage manufacturing partners. We were able to swiftly pull together a network of producers, packaging experts and sales professionals who are able to produce in excess of **20+ million finished bottles & 2bn individual packets** of hand sanitizer monthly.
