

# Time & Expense Tracking Designed for Professional Services

Your time is valuable. Capture everything you need and nothing you don't with project-based time and expense tracking that works with your ideal technology stack.

#### Quick

Allow your staff to log entries quickly from anywhere and get back to business

#### Reliable

Utilize a system of record that you can rely on for accurate, validated data

#### Easy

Tailor the time and expense experience for your staff with a system they'll want to use

#### **Integrated**

Create a seamless flow of information between your tools

# **BigTime Time & Expense**

# Simple To Setup

The easier it is to log time and expense, the better your compliance will be. Tee things up for your staff so they can focus on their work instead of their entries. With configurable fields and defaults, it takes less effort for users to submit their data.

# Designed To Match To Your Workflow

Time and expense tracking doesn't stop when your users click "save." Out of the box validations, configurable multi-level reviews, and one-touch approvals simplify the rest of the process, while notifications keep your teams informed.

# **Intuitive Time Entry**

Maximize billable hours by eliminating time wasted on entry, re-entry, error, and extraneous fields. Enable users to build their entries over time without losing progress and pre fill rows based on prior work, making logging time and expense quick and easy.

# Reporting That Turns Inputs Into Action

Time and expense data should be easy to export as it is to input. Visualize information with dashboards and push it to your finance system en masse or in batches.

# Integrations That Allow You To Leverage The Right Tools At Any Stage Of Your Growth

Empower your teams to have informed conversations with customers by arming them with a complete view of all deal and project data in BigTime.

Time and Expense Designed Just for You
