# BIGTIME

Industry-leading Payment Security

Protecting you and your clients data is a top priority, that's why we ensure BigTime Wallet is one of the industry's most secure payment processors. Here's how we take all necessary steps to safeguard your business and secure your sensitive payment data.

✅ PCI DSS Compliance

We are serious about security. BigTime Wallet meets all standards set by PCI Security Standards Council. This ensures the entire operation from processing, transmitting, and storing data, is in compliance with Data Security Standards.

✅ Level 1 PCI Compliance

We don't just check the box. BigTime Wallet not only meets PCI compliance, it meets the standards at the highest level: Level 1. We offer all clients resources and insight so they can stay compliant, including an Approved Scanning Vendor to scan systems and search for any vulnerabilities.

✅ End-to-End Encryption and Tokenization

Feel protected on ever transaction. On top of PCI standards, BigTime Wallet encrypts all card information and, once the transaction is complete, never stores the data. Our modern tokenization prevents others from any interception or viewing the data.

✅ Fraud Prevention

Proactive prevention is key. We have additional technologies within BigTime Wallet to specifically monitor and investigate accounts for any potential unauthorized charges. Our partnership with Know Your Customer and Customer Identification Program works to verify merchants, their businesses, and their funding accounts.

✅ GDPR Compliance

While this only applies to those in the EU, our solution is aligned and committed to transparency, data protection, and accuracy to remain GDPR compliant.

The Greatest Consulting Firms on The Planet Trust BigTime

> " *Ever since adopting the software, we've never looked back. BigTime not only met our requirements but opened our eyes to 20 other features that we could use to enhance productivity. We've taken advantage of the app's workflow and functionality to take our business to the next level.*
