My Company | Project List | Stark Industries: Development

Start projects faster with all the information your team needs, when they need it, available where they already work.

### Efficiency

Streamline activities with automated project creation

#### Accuracy

Eliminate risk of error from data double entry

### Visibility

Pre-populate projects with important deal details

### Flexibility

Control how information is pulled into BigTime

# BIGTIME MARKETPLACE HubSpot Integration

### **Create Projects Automatically**

Execute on work faster by triggering projects to be created at a certain lifecycle stage.

### **Optimize Workflows**

Configure sync settings for your business needs so the connection works the way you expect it to.

# Automate Information

Automate your system of record by mapping important deal data to projects so you can keep everything in one reliable place.

# Make Smarter Decisions

Enable informed resource allocation and project planning with mistake-proof data transfer.

# **Build Better Relationships**

Empower your teams to have informed conversations with customers by arming them with a complete view of all deal and project data in BigTime.

Integrations that work.
