

Workplace Collaboration Insights

Help your organization better understand how it works with **Vitalyst's Workplace Collaboration Insights**. Our Collaboration Assessments are conducted as a baseline analysis before deployment of our Adaptive Learning Platform, which is a comprehensive toolset that will allow your business to learn to work more collaboratively using Office 365.

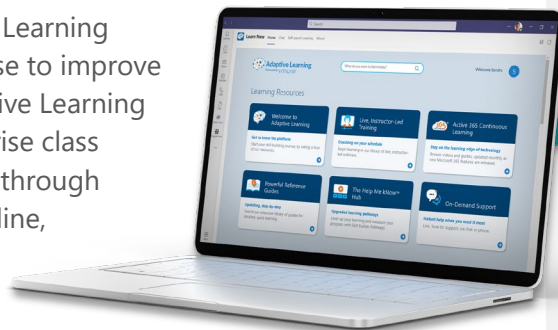

Vitalyst Workplace Collaboration Insights includes:

Collaboration Assessments

Powered by Microsoft Workplace Analytics, Collaboration Assessments help analyze your organizations' collaboration and teamwork efforts while also providing actionable insights to improve your overall meeting culture, management, and employee engagement.

The Adaptive Learning Platform

Using the data from the Collaboration Assessments, Vitalyst's Adaptive Learning Platform will allow your enterprise to improve key collaboration metrics. Adaptive Learning provides direct access to enterprise class adoption services – all delivered through Microsoft Teams, SharePoint Online, or the web.

Vitalyst Workplace Collaboration Insights will:

- Help you to discover your organization's collaboration patterns
- Reduce risk of burnout by promoting employee wellbeing
- Power remote work with the Microsoft 365, especially Teams
- Maximize ROI on your investment in Microsoft technology

Who we are

Vitalyst is a learning and development solutions leader helping organizations humanize technology. As a Microsoft Gold Partner for the last decade and two-time Microsoft Partner of the Year winner, Vitalyst has helped over 400 customers across all industries.

Our services are fueled by our proprietary PROPEL® Methodology, which enables organizations to leverage the full power of technology throughout all phases of the adoption lifecycle: Onboarding, Activation and Continuous Learning.
