# About expert.ai

Master the Data Domain of Language With expert.ai

Language is data. The unstructured language data found in your reports, emails, documents, chat messages, etc., all hold great value for the enterprise. This is the data that runs your business. The challenge is gaining visibility into this multiplying mass of data and maximizing its value. Unfortunately, processing documents is mainly a manual process. It's time-consuming, often error-prone, subjective, and reliant on internal subject matter expertise. Expert. ai solves these challenges by offering the most comprehensive, intuitive, and powerful set of AI tools in the market for language understanding. Transform language in all its forms into a data asset that accelerates knowledge-intensive processes, improves decision making, and enables your internal experts to focus on the most important high-value, strategic tasks.

Language Data Grows 2X Faster Than Structured Data

-Credit Suisse

Capturing and understanding language data is a strategic imperative for today's business leaders.

Expert.ai understands language so you can scale your business.

The Leader in HybridNL

Expert.ai's global team of natural language experts pioneered natural language understanding (NLU) technology that employs semantics to help machines understand text by resolving ambiguities. This technology is how we help enterprises create natural language-based AI solutions that deliver immediate results and superior accuracy. It is also the backbone of our new HybridNL platform which provides the unique ability to combine the strengths of both machine learning and knowledge-based techniques (symbolic AI) to understand the meaning and relationships in language at speed and scale.
Symbolic AI + **Machine Learning**

Hybrid NL

Our Solutions

Expert.ai Platform

Purpose-built with end-to-end tools that turn language in all its forms into a data asset, our HybridNL platform makes it easier, faster, and less expensive to design, deploy, and operate powerful natural language solutions.

Expert.ai NL API

Developers and data scientists can leverage a comprehensive set of language analysis features to quickly build natural language applications that deliver deep language understanding with superior accuracy.

Expert.ai Studio

Build and deploy custom knowledge-based AI models with our fully-integrated development environment.

Our Customers

Expert.ai works with some of the biggest and most advanced global enterprises to solve their natural language problems. We've helped more than 300 companies put natural language understanding at the core of their critical processes.
