Heavy Construction **ATTACHMENTS**

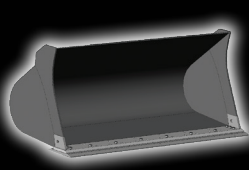

GEM Attachments are manufactured by TRM Manufacturing in Northeast Ohio. Our Engineering, Sales, Manufacturing and Management teams have been in the industry their entire careers. We are employee owned and work as a team for the benefit of our customers and each individual team member.

Our goal is to provide our customers with the best quality and dependable products at a price that offers the best value in the industry. You have our word on that.

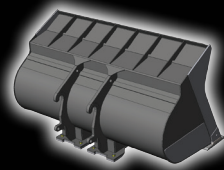

BUCKETS

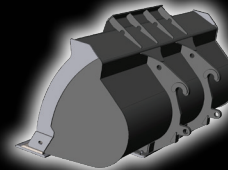

GEM Attachments are built for the construction, agricultural and demolition industries. We engineer our buckets to match specific OEMs specifications. Each bucket is sized for both the machines capabilities and the application of use. Buckets come in most major hydraulic coupler configurations or pin-on style. To find the correct size and type contact your local dealer or our customer service department.

LOADER COUPLERS

Our couplers are engineered and built with the goal of lasting the life of your machine. They are constructed with a lower reinforced box section, heavy duty main plates and a bottom runner that extends the full length of coupler. We offer couplers compatible with the most of the industry's major interchanges.

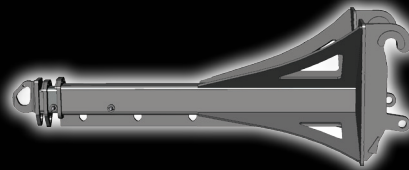

Coupler

SPECIALTY ATTACHMENTS

GEM Attachments also manufactures a wide variety specialty attachments and add on tools to make your machine more versatile. We offer grapples, booms, bale spears and snow plows all of which are built around your specific machine. As with our buckets and forks, our specialty attachments come in both pin-on and quick coupler applications for most major coupler system mounts.

FORKS

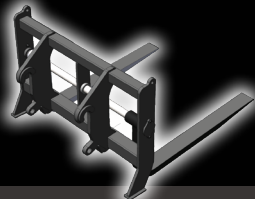

We build a wide variety of forks and double clamp forks to meet both general use and specific application use. For safety, our tines exceed the loaders lift capabilities. Carriage lengths run from 60" to 120" and tine lengths range from 48" to 96". We offer both pin-on and most major coupler system mounts.
