## **INSTALLATION**

Wet Sounds REVO XXX marine subwoofers have been specifically designed to produce high Sound Pressure Level (SPL) when used in ported or vented enclosures. For optimal vented/ported enclosure specifications, it is suggested that you visit [www.wetsounds.com](http://www.wetsounds.com) for complete details.

## **PLEASE NOTE**

REVO XXX subwoofers are extremely heavy and will require an enclosure with adequate support. Minimum enclosure wall thickness of  $\frac{3}{4}$ " with internal bracing is recommended. For the REVO XXX-15 a brace to support the extremely heavy magnet structure is highly suggested to avoid damage of the subwoofer frame or the enclosure.

## **KEEP THE SHIPPING BOX!**

The shipping box supplied with REVO XXX subwoofers is specially engineered to accommodate the extreme size and weight of these subwoofers. In the unlikely event that your REVO XXX subwoofers will require service it is suggested that you keep the shipping box to ensure adequate packing while in transit to and from the Wet Sounds facility.
