

Harness the power of LED Digital Posters

Starting at just \$99/month*

Our all new **4mm Digital LED Poster** offers businesses a dynamic solution with marketing flexibility that can lead to increased sales and revenue.

Ditch costly paper signs that blend into the background

Your window front is prime advertising space for your business and it should be working hard to drive sales. Static, printed posters only allow one promotion at a time and can be hard to see. Our high definition digital LED posters allow you to promote multiple offers and are bright enough to be seen from a distance in direct sunlight.

Change content and promote multiple offers easily

A stunning and dynamic solution, our digital LED poster allows your business to quickly and easily change content for any reason, at anytime, from anywhere. Paired with ScreenHub, our user-friendly and always free, cloud-based content creation, management, and monitoring system, it is simple to tie all your on-premise digital advertising together.

Did we mention affordable?

To make this even easier for any size business, we are offering our state-of-the-art LED digital posters on a monthly subscription **starting at just \$99 a month** for a 2' x 3' digital poster.
