

ONE-CLICK DASHBOARDS

Are you tired of spending hours preparing reports that nobody reads? Wouldn't it be great to display your most important data with just **one click**? What if your Learning or Talent Management System's reports highlighted the impact your efforts are having on the company bottom line?

Many Learning and Talent Management platforms don't have the flexibility to customize the type of reporting that users want, or it's too complicated to figure out. Bluewater's team of developers and designers can create completely customized pages within your Learning and Talent Management System* for a seamless delivery of what you need, including:

- + Minimize the number of clicks needed to display desired info
- + Descriptive & easy-to-understand graphical data interpretation
- + Identification & display of Key Performance Indicators (KPIs)
- + The ability to isolate what's important to the viewer based on user profile
- + Data merged from external sources—tying sales data to learning activities

*Please mention which LMS or TMS you are using to ensure Bluewater REPORTING PAGES are currently available for your platform. REPORTING PAGES currently work with most of the leading vendors in the market and the list is expanding based on customer demand.

BENEFITS

Bluewater Reporting Pages are customized dashboards that incorporate multiple filters, levels and output types, yearly check-ups, and compliance widgets all at one click.

Bluewater Reporting Pages helps you manage your programs, demonstrates the value of learning and talent initiatives, identifies talent gaps, and shows the impact on business results.
