# SYMBOL LEGEND

Look for these helpful icons throughout the catalog.

Identifies value pack.

Assembly required.

Products that must be shipped freight.

Identifies items that cannot be returned.

Meets or exceeds ANSI/BIFMA standards for safety and durability.

Products made with at least 10% total recycled content.

Requires additional delivery time; limited availability.

Indicates vacuums that have received the Carpet and Rug Institute Seal of Approval/Green Label Certification. The CRI's seal identifies only those vacuums that meet strict performance standards for soil removal, dust containment and wear to the carpet, as verified by independent laboratory testing.

Products that meet the recovered materials content ranges specified by the EPA through the Comprehensive Procurement Guideline (CPG).

Identifies products third-party tested for environmental responsibility.

Because there is no universally accepted standard to designate products as environmentally preferable, we have adopted the green leaf symbol to highlight products that have one or more of the following attributes: reduced VOCs, compostable, biodegradable, contains recycled content, or other environmental attributes that make this product<sup>1</sup> less harmful to the environment or humans, when compared to its traditional counterparts. Many of the products marked with the green leaf symbol have been endorsed by third-party certifying organizations, and where applicable, the certifying body's logo appears next to the product's name. Please note that we have not independently verified the environmental attributes. <sup>1</sup>These environmental attributes refer to the products themselves and not the processes for manufacturing and transporting the products.

# MIXING THE RIGHT SOLUTION!

Use this chart as a guideline for diluting the products sold in this catalog. 1:x means 1 part concentrate to x parts water. For example, to make a quart of solution in a 1:15 dilution, mix 2-oz. of concentrate into 30-oz. of water. **NOTE: To minimize foaming, fill the container with water before adding the concentrate. Then stir thoroughly.**

## Concentrate Needed to Make the Following Amounts of Solution

**G Concentrated Bleach** Keeps clothes whiter longer based on stain removal verses detergent alone and cleans and protects surfaces by reducing soil adhesion while leaving two times more fragrance. Formulated with new scent technology that masks the aroma of bleach and only leaves an intense smell of clean. The concentrated formula, filtered three times to deliver the purest bleach, removes 70% more stains than detergents alone and protects surfaces for easier, reduced cleaning effort.

**MISTY**

**C Painless Stainless Steel Cleaner** Stainless steel cleaner is a creamy foam, water-based formula used for cleaning and polishing stainless steel, chrome, Formica®, copper, aluminum, brass and other hard surfaces. The water-in-oil emulsion, where the oil surrounds the water and contacts the surface to be cleaned first, allows the product to act like a solvent (oil-based) system without the oiliness or flammability. Pleasant lemon fragrance cuts through grease and oil while leaving a protective shine, and is ideally suited for use in food preparation areas, where the odor of mineral spirits and aromatic solvents would be objectionable. 360° valve.

SWEET SMELL OF SUCCESS

In the early 1950s, many companies began to add to their formulas chemicals intended to actually destroy or neutralize offensive odors, as opposed to simply masking them with fragrance. Compounds used for this purpose included various unsaturated esters, long-chain aldehydes and a few pre-polymers.

**D Pacific Blue Ultra™ Soap/Sanitizer Dispenser** Made for high-traffic areas and heavy day-to-day use. The durable design, high-capacity refills and adjustable portion control help your budget go further. One model for many spaces also streamlines inventory, simplifies maintenance and refills and saves you time and money. Use this multi-purpose dispenser for restrooms, classrooms, food prep areas or any work station where good hygiene is essential. We know that healthy, sanitary work environments are a must for customers and employees alike. Designed as a part of a closed system, our manual soap and sanitizer dispenser reduces the risk of cross-contamination by 25% over traditional dispensers, which reuse the same nozzle again and again and can spread germs and bacteria. Part of an entire family of high-quality products that gives your restrooms and workspaces a coordinated, elevated image. Pair Pacific Blue Ultra soaps and hand sanitizers, with matching paper towel dispensers and towels, to give your employees and customers clean, beautiful spaces. **F Pacific Blue Ultra™ Paper Towel Dispenser** The automated dispenser features motion activation and touch-free dispensing, and the mechanical dispenser features a no-touch hang mode. Both dispensers offer one-at-a-time, enclosed dispensing, so you only touch the paper towel you use. That helps cut down on germ transmission, and helps reduce waste. Dispensed towels are cleaner and more hygienic than stacked folded towels, and help cut down on maintenance. Unlike with folded towels, customers can't grab stacks of dispensed towels, so they're less likely to end up all over the floor. Both dispensers use the same paper towel refills, so they're a considerable value for the price. And refills for both dispensers are available in 3-roll and 6-roll cases, which helps control costs and maximize storage space. This dispenser's long-lasting paper towel rolls help reduce maintenance calls and run-out, and help you save money. Built to handle heavy usage. Your restroom is a reflection of your business. And incredibly, one-half of all customer complaints are restroom related. All the more reason to put your best restroom forward. Part of an entire family of high-quality products that give restrooms, breakrooms and workspaces a coordinated, clean, elevated image. Pair with Pacific Blue Ultra paper towels, soap dispensers, soaps. Manufacturer's limited five-year warranty.

# BUYING GUIDE

The right wiper for the right task!

Wipers are used in every cleaning application from personal care to equipment maintenance. Not all wipers are created equal. Different wipers are designed to be especially effective for certain tasks. Each is engineered with nonwoven substrates, weights, binders and colors in order to balance the different attributes required for optimal cleaning and productivity—strength, absorbency, solvent resistance, lint, wipe dry and hand feel. Just like a tool, matching the right wiper with the right task will make the job easier and more cost-effective. Boardwalk wipers—the right tool for any task.

**B Wipers for the WETTASK® Refillable Wet Wiping System** An ideal alternative to using a spray bottle or open bucket with rag. Wipers are specifically designed to be compatible with quat disinfectants and sanitizers. They maintain the target disinfectant concentration and provide a more uniform application than is possible with a cotton rag. Simply add a roll of wipers and your own chemical solution to the WETTASK® disposable bucket with secure lid. Wipers dispense one at a time, preventing cross-contamination of the cleaning solution while reducing exposure to chemical vapors and splashes. Buckets can be prepared ahead of time and are easily transported, allowing you to spot clean germ zones several times a day.

# FLOOR & CARPET CARE

**A – C Total Care 3-Mat System™** Keeping your building's indoor surfaces clean is as easy as 1-2-3. These mats are designed to work together at entryways with heavy foot-traffic, including those at office buildings, stores, schools, restaurants and hotels. Start outside with the Fore-Runner™ Scraper Mat. Then use the Cross-Over™ Wiper/Scraper Mat in the breezeway. The moisture-absorbent Walk-A-Way™ Wiper Mat completes the job in the foyer. Manufacturer's Total Confidence Warranty.

**A Fore-Runner™ Indoor/Outdoor Scraper Mat** The tough, durable loop-twist construction of these outdoor floor mats scrapes off dirt and grit before it enters the building. Ideal for locations with a large number of daily visitors, including office buildings, universities, convention centers and resorts.

**A WaterGuard Indoor/Outdoor Scraper Mat** These mats are recommended as an indoor mat, but substitutes as an outdoor mat in warm to moderate climates. The bi-level construction allows dirt and debris to get trapped below the walking surface and off your floors. The polypropylene carpeted surface makes this a scraper to remove debris and also a wiper to help trap moisture. The non-slip all-rubber cleated backing provides a secure gripping action to carpets and hard surface floors. The beveled edge border helps contain the dirt and moisture and helps reduce the chance of slips, trips and falls. Easy-to-clean and maintain—just shake out, vacuum, hose and dry or clean with a light carpet cleaning machine.

# Buying Guide Chair Mats

1. Determine flooring type—carpet or hard floor
2. Determine use—consider factors for frequency of use, weight placed on mat and type of flooring

For Carpet  For Hard Floor

ALL DAY USE	FREQUENT USE	MODERATE USE	OCCASIONAL USE	ALL DAY USE
ALL DAY	6-8 Hrs.	4-6 Hrs.	0-4 Hrs.	ALL DAY
HEAVY	AVERAGE	AVERAGE	LIGHT	AVERAGE
HIGH PILE	MEDIUM PILE	LOW PILE	FLAT PILE	HARD FLOOR

### 3. Determine your carpet thickness

- Open one end of a paper clip.
- Insert paper clip into carpet and pad, pushing down to the sub-floor.
- Measure the portion of the paper clip that entered the carpet and pad, and then reference the guide below.

### 4. Measure your floor area to determine size and shape

**A Premium Glass Chair Mat** Extremely durable, 1/4" thick, fully tempered recycled glass mat suitable for combined user and chair weights up to 1000 lbs. # GLOVE PROTECTION GUIDELINES

## Facts and Tips about Gloves:

- Gloves protect your hands from the following workplace hand injuries: sharp objects, abrasive surfaces, moving components, wet environments, chemicals, blood-borne pathogens and viruses.
- You must follow a safe procedure for removing gloves so soil, chemicals or viruses do not come into contact with your hands. Remove one glove from top to bottom with the other gloved hand. Then, tuck the first glove into the other gloved hand and peel off the second glove from the inside.
- The glove cuff style is an important consideration based on the protection needed. Some cuffs will allow the glove to be removed quickly or allow ventilation.
- There are several standards and ratings for cut-resistant and coated gloves (i.e. EN, ANSI, ASTM, etc.). Compare similar standards when choosing gloves because ratings can be determined based on different testing methods.
- If you have an allergy to latex or rubber, look for gloves that contain no latex such as vinyl or nitrile.

## Size and Fit Matter:

Size and fit are very important to properly protect your hands. Poorly fitted gloves will not be worn and increase the chance for hand injuries.  
 Too small: make hands fatigue while providing less dexterity and decrease productivity  
 Too big: more likely to get caught in moving components and not have proper dexterity  
 Measure your dominant hand with a tape measure around the palm and knuckles.  
 Here are some general guidelines for men's sizes.

7.5 – 8" – Small      10.5 – 11" – X-Large  
 8.5 – 9" – Medium      11.5 – 12" – XX-Large  
 9.5 – 10" – Large

General guidelines for women's sizes.

6" – X-Small      7.5" – Large  
 6.5" – Small      8" – X-Large  
 7" – Medium

## Questions to Consider When Buying Gloves:

- In which task or application will you be wearing gloves for protection?
- What types of gloves do you use? Why?
- What types of hand injuries happen in your work area?
- What do you like or dislike about your gloves?
- If you can change one thing about your gloves, what would it be?
- What are the costs of the gloves you have purchased recently?

## Gloves by Application:

• There is no one glove that will fit each job or situation. Assess the job and protection needed to purchase the right glove. Below is a chart that shows the types of gloves commonly found in various applications.

# GLOVE TYPES AND ATTRIBUTES

## Unsupported: (Chemical Protection)

(Disposable and Multi-Use)

Reliable and economical protection.

**Materials:** Butyl, Latex, Neoprene, Nitrile, Vinyl.

**Uses:** Small part handling, food handling, medical and lab use, manufacturing.

**Attributes:** All latex, vinyl and polyethylene disposable glove component materials comply with relevant federal regulations for food contact. Many are Medical Grade, Class 1 Medical Device approved. Nitrile and vinyl are great alternatives for those with latex allergies. Ideal for tasks when greater dexterity is needed.

## Supported: (Chemical Protection)

(Cut/Sewn, Dipped and Cut Protection)

**Materials:** Butyl, Neoprene, Nitrile, PVC.

**Uses:** General cleaning, chemical processing.

**Attributes:** Delivers a varying degree of cut protection and enhanced grip.

## Leather: (Leather Palms, Drivers and Welders)

Provides durability, dexterity and comfort.

**Uses:** General and medium-duty tasks.

**Attributes:** Leather palms (shown left) are a popular type of leather glove.

Lined leather gloves provide added warmth in cold environments.

## Cotton: (Canvas, Jersey and Terrycloth)

Cotton material is cut and sewn together in glove pattern.

**Uses:** These can keep hands clean and protect against abrasions, but may not be strong enough to handle work with rough or sharp materials.

**Attributes:** Good abrasion, some with enhanced thermal protection.

## Strings: (String Knit, Dipped and Cut Protection)

Fibers are knitted together in glove pattern.

**Uses:** Light-duty tasks.

**Attributes:** Allows hands to breathe and reduces perspiration. Provides protection and dexterity. Can be used as a liner for extra protection. Coated/Dotted knits also provide extra grip.

## Coated or Dipped Seamless Knit:

(Ninja, Flex, Tuff, UltraTech and Memphis)

Glove is dipped in a polymer coating for added protection.

**Uses:** Some chemical handling, cleaning, oil refining, food processing.

**Attributes:** Coatings protect against solvents and chemicals, abrasions, punctures and cuts.

## Cut Protection: (Supported, Strings and Synthetic)

Protects hands from sharp edges such as blades, glass, metal, ceramics, etc.

**Uses:** Medium to heavy-duty tasks.

**Attributes:** Materials can vary, such as Kevlar®, Dyneema® or composite yarns (HPPE). Not effective in protecting against punctures or power equipment.

## Multi-Task: (Leather, Synthetic and Cotton)

Extra material offers more protection.

**Uses:** Tasks that require superior or specific area protection but with dexterity, grip and working with small parts.

**Attributes:** Offers specific protection areas and materials depending on the particular task.

**European Directives for Personal Protective Equipment**

European Standard EN388 established the criteria necessary for rating all PPE items. Many of our hand protection offerings meet these standards – reflected with the CE logo – and have a 4-digit performance rating that measures abrasion, cut, tear and puncture resistance (ACTP).

A glove's overall performance score is indicated by four numbers that represent the four test criteria. The higher the number, the better the performance. Manufacturers may use an X to indicate not tested.

Criteria	Rating
<b>A</b> Abrasion Resistance	<b>0-4</b>
<b>C</b> Blade Cut Resistance	<b>0-5</b>
<b>T</b> Tear Resistance	<b>0-4</b>
<b>P</b> Puncture Resistance	<b>0-4</b>

# PROTECT YOUR EYES!

**Personal protective eyewear, such as goggles, safety glasses and faceshields, must be used in a workplace where an eye hazard exists.**

Each day approximately 2,000 U.S. workers sustain an eye injury on the job that requires medical treatment. A third of the injuries are treated in ERs and more than 100 result in a day or more of lost work. The majority of injuries occur because of small particles or objects striking or abrading the eye.

**Having the right protective eyewear is critical in preventing eye-related injuries.**

Before choosing eye protection, identify the hazards of your workplace. Then, the choice can be made between safety glasses, goggles or a combination with a faceshield as secondary protection.

Eye protection should be fit to the worker or adjustable to provide for appropriate coverage. The worker's personal vision should be considered, with safety glasses large enough to allow the user to wear their own glasses underneath.

[www.cdc.gov/niosh/topics/eye](http://www.cdc.gov/niosh/topics/eye)

## Eyewear Types

**Safety Glasses** protect against general impact; however, speed of impact must be considered. The higher the velocity, the more likely the safety glasses could be dislodged. In this case, goggles or a faceshield may be a better choice. **See pages 324-328.**

**Goggles** are available in direct and indirect vented styles. **See pages 328-329.**

Direct vented goggles allow airflow, but are only approved for protection against particulates. Use for jobs such as grinding or cutting where dust is an issue.

Indirect vented goggles are for protection against vapors, chemicals, liquids and dust.

**Full Faceshields** are the best option for workers exposed to flying particles or chemical splashes. Use in conjunction with safety glasses or goggles to protect against secondary hazards. **See page 330.**

## Eyewear Features

**UV Protection**—for workers exposed to ultraviolet radiation, such as outdoor workers and welders.

**Hard-Coated**—for applications where lens scratching is an issue.

**Anti-Fog/Anti-Mist**—for workers who are exposed to extreme temperatures or warm humid environments.

**Clear Lenses**—for indoor or outdoor applications in below-normal light conditions.

**Gray or Brown Lenses**—for outdoor use where above-average light is available.

**Amber Lenses**—for applications where light is below normal or enhanced contrast is needed.

### NRR footnote

\*Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in earplug fit and wearing time. It is recommended that the NRR be reduced by 50% for estimating the average amount of noise reduction provided.

### 3M WARNING!

Choking Hazard – Keep away from infants and small children. These hearing protectors help reduce exposure to hazardous noise and other loud sounds. **Misuse or failure to wear hearing protectors at all times that you are exposed to noise may result in hearing loss or injury.** For proper use, see supervisor, *User Instructions*, or call 3M PSD Technical Service in the USA at 800-243-4630. In Canada, call Technical Service at 800-267-4414. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing earplugs. Failure to do so may result in hearing loss or injury. **Noise Reduction Rating (NRR):** 3M strongly recommends fit testing of hearing protectors. If NRR is used to estimate typical workplace protection, 3M recommends that NRR be reduced by 50% or in accordance with applicable regulations. See *User Instructions* for more information.

**E - G Maintenance Sorbents** Lightweight, versatile, and takes just minutes to put in place. Dust-free and contains no abrasive granules that can damage expensive equipment. Can be incinerated or fuel blended, leaving less than 0.2% ash. Wring out and reuse numerous times with virtually no loss of sorbent capacity. Allows you to get at the source of a leak before it becomes a bigger problem.

**E High-Capacity Maintenance Sorbent Pad** Highly absorbent and nongranular so it's perfect for placing directly on machinery. Will not damage plant equipment. Low profile so it fits in tight places. Tuck it in or around machines to catch and contain leaks at the source.

**F High-Capacity Maintenance Folded Sorbent** Four sorbents in one. It can be used as a boom, pillow, pad, or roll, which means you stock one product to meet your sorbent needs. Perforations every 16 inches allow you to select the length required, so there's less wasted sorbent. Comes in a handy dispenser box for easy, on-site use. 3M's high capacity sorbent technology: has increased fluid-holding capacity which means less sorbent used; allows for simple reclamation for recycling of valuable liquids and re-use of sorbent; and minimizes sorbent waste for disposal.

**3M** **WARNING!**

**FAILURE TO PROPERLY HANDLE AND DISPOSE OF SORBENTS CONTAMINATED BY HAZARDOUS MATERIALS MAY RESULT IN SERIOUS PHYSICAL INJURY OR DEATH AND/OR ENVIRONMENTAL HARM.** For proper handling, consult the *Safety Data Sheet* for the material adsorbed, and applicable safety and health standards, contact your supervisor, or call 3M at 1-800-243-4630. To reduce the risk of serious injury or death, adequate precautions should be taken when handling or storing sorbents contaminated by hazardous materials, and appropriate personal protective equipment should be worn. Transportation and disposal of container and its contents must comply with applicable laws and regulations.

3M™ Maintenance Sorbents and 3M™ Petroleum Sorbents must not be used with aggressive liquids, including caustics, acids, oxidizers, and reactive chemicals. 3M™ Chemical Sorbents can adsorb most acids, bases, and other hazardous fluids. For further information regarding chemical compatibility, contact 3M.

Make Fire Safety a Priority!

Each year more than 5,000 people are injured in fires and explosions on the job.\* Keep extinguishers within reach to safeguard your workplace. OSHA standards require employers to provide proper exits, firefighting equipment, emergency plans, and employee training. A fire safety program is critical for employee safety and facility compliance — make sure yours includes fire extinguishers and smoke alarms. For OSHA requirements for placement and maintenance of portable fire extinguishers, visit [https://www.osha.gov/SLTC/etools/evacuation/portable\\_required.html](https://www.osha.gov/SLTC/etools/evacuation/portable_required.html)

**FISKARS®**

**A Pro Pruner** An adjustable, ergonomic design provides comfortable use when cutting stems and branches up to 1" diameter. This pro-style pruner features adjustable blade tension to fit your hand strength and the toughness of the material you're cutting. Angled cutting head helps reduce wrist fatigue and makes it easy to prune at awkward angles. The fully hardened, precision-ground steel blade stays sharp, even through heavy use. A low-friction coating helps the blade resist rust and prevents the blade from gumming up with sap and debris, making cutting even easier. Built-in sap groove provides smooth operation. Convenient hanging hole allows for easy storage.

# STORAGE & MATERIAL HANDLING

# FIND THE TRUCK YOU NEED!

## Truck Type

## Features and Benefits

### Cube Trucks

Use these durable and versatile trucks for a variety of bulky, load-carrying tasks including waste collection, material transport and laundry handling. Available in four capacities. Find these on page 473.

### Tilt Trucks

These trucks maximize maneuverability and make it easy to dump contents. Ideal for handling bulky materials and loads that are medium to heavyweight. Insert wheels and the overall profile helps protect surroundings. Consider your need for the lid option. Find these on page 474.

### Platform Trucks

Accommodate loads of varying shapes and sizes aboard a high-capacity platform truck. Depending on what you're moving, you'll want to look at support—more when you're loading multiple, hard-to-balance items—less when loads are more well-balanced. Some platform trucks offer work-height surfaces. Find these on pages 464-465.

### Hand Trucks

Carry a surprisingly heavy load with ease and agility with a two-wheeled hand truck. Buy a model that's dedicated to this role, or combine functionality with a convertible truck that switches from a two-wheeled configuration to a four-wheeled platform. Find these on pages 463-464.

### Convertible Trucks

Change configurations to use one truck for multiple applications. Some versions combine removable shelving with a more open platform truck option. Others provide support alternatives that adjust to the loads you're transporting. Find these on page 466.

# BAGS & CAN LINERS

# LINERS FOR EVERY NEED!

## Choose From Two Types of Plastics

**Linear Low Density (LLD)** — Tougher transport conditions require the superior tear resistance of LLD liners. This plastic is designed to perform in environments with higher risk of tears or punctures, either from the can liner contents, surrounding environment or through transportation to disposal units, as LLD does not tear easily, even after puncture. **Find these on pages 513-516.**

**High Density (HD)** — When greater puncture resistance and load capacity are the priority, select HD liners. Even with thinner construction, HD liner material delivers puncture and load benefits—performing well with waste that is heavy, such as unbroken glass, or other materials that do not have sharp edges. **Find these on pages 520-522.**

## Strength Grade and Gauge

**Strength grades** are based on static load, also known as lifting strength. LLD and HD plastic materials achieve the same static load with different gauges; order your bags accordingly. Use this chart for easy reference to determine approximate gauge equivalents.

Strength Grade	LLD Mil Gauge	HD Micron Gauge
Light	.35 – .44	5 – 9
Medium	.45 – .57	10 – 12
Heavy	.58 – .69	13 – 14
Extra-Heavy	.70 – .89	15 – 17
XX-Heavy	.90 – 1.14	—
Super	1.15 – 1.39	—
Super-Heavy	1.40 – up	18 – 24

**Light**—Use for crumpled paper, cups and light waste.

**Medium**—Appropriate for packaging waste, wet paper and similar mixed trash.

**Heavy**—Choose for light wood, metal scraps and wet cardboard.

**Extra-Heavy**—Select for use when trash is consistently heavy, wet or sharp.

**Super/Extra-Heavy**—Use on the heaviest cleanup jobs, in warehouses, cafeterias, or facility grounds.

## Capacity

**Know the capacity** of your receptacles and select the bag or liner to suit. Bags and liners are available in a multitude of sizes; gallon capacity is listed with each item throughout this section.

## Bottom Seals

**Star-Seals** — The most common type. Conform easily to any shape waste container, distribute weight evenly inside the bag and have the maximum carrying capacity.

**Flat-Seals** — Hold more volume than like-sized star seals. Appropriate for somewhat lighter weight loads.

**Gusset-Seals** — Another seal found in flat-style bags. Offer a good fit in certain receptacles and appropriate for somewhat lighter loads.

Use the sizing guide below to locate your waste receptacle. The right liner size is listed next to it.

## The right size is important!

Ideally, you should have about three to four inches of liner overhang on your receptacle. Anything more or less is wasteful of both time and money.

GET THE  
RIGHT FIT

Using the correct can liner size is key to being cost-effective. Take a look at how bags fit each bin or can at your facility. If they hang over the edge of the receptacle by more than four inches, you are using too much bag for the job!

**B Eco Food Trays** Ideal for food trucks, restaurants, picnics, parties, movie night and more! Eco food trays are made from all kraft paperboard, which contains at least 18% recycled wood fiber content. Like all of our other food trays, the new Eco trays are highly recyclable and compostable when disposed in proper commercial facilities. The trays have disposal logos printed on the bottom to effectively communicate this with your customer. In addition, Eco Trays are made using a totally chlorine free manufacturing process, which consumes less raw material and water, leaving more of those resources untouched. Clearly, Eco Trays are the natural choice for your foodservice needs and our environment.
