Advice from Apprentices

Print off your calendar - add key dates into your phone such as deadlines, exams and work-based learnings and case-study submission dates.

Co-ordinate with your mentor/supervisor for deadlines on case studies and work-based learning tasks. They must sign-off on all submissions.

Do not be afraid to ask questions of peers, lecturers, mentors, colleagues, supervisors and of course Catherine Kennedy.

Create a study plan. Allow yourself down time and time to just switch off. Factor in exam preparation.

Familiarise yourself with the [iii](#) and IT Sligo websites ([iii](#) is a great resource with podcasts, webinars and mock exams). Don't forget IT Sligo's great supports.

It is so important to have a WhatsApp or Facebook group with your classmates.

Always try to ask questions in class, if something is not clear speak up. If you have concerns talk to your class rep.

Some IT Sligo exams are continuous assessments (CA) which are a large % of the overall marks. Strive to achieve a high mark on CAs, it will relieve pressure later.
