

The
Insurance
Institute

How will it work?

Once you have successfully applied for the Higher Diploma in Insurance Management programme and have been accepted, your details will be passed to the marketing team, who will confirm that a tree will be planted in your name, this October by Wolfgang Reforest.

After the application window closes in July, The Insurance Institute will provide Wolfgang Reforest with the final count of trees required and they in turn will provide us with a series of certificates, which we will assign based on the original names provided.

These certificates will include the location of each tree and once personalised will be sent to each student.*

**It is important to flag that no data will be transferred to Wolfgang Reforest and that all emails, personalisation and presentation will be handled by The Institute.*

Your Future, Insured.
