

MANAGED SECURITY SERVICES

To protect your organization today from the ever-evolving set of security threats requires you to have a unique combination of timely threat awareness, and effective management of your information security technology.

As these threats continue to mature, the reality is that many organizations do not have the operational resources to address them on their own.

Online's Managed Security Services (MSS) works as an extension of your team - providing you with the assurance that your environment is being monitored, engaging you as necessary, and ready to act on your behalf when we are needed.

Our suite of MSS offerings are designed to help our Clients see a lower total cost of ownership versus in-house alternatives with value being realized immediately as standards are established, staffing secured, and tools are normalized to increase efficiency and effectiveness.

The Online Difference

When you want advanced technology you can depend on, and supported by an experienced team that makes your monitoring a priority.

Open Source Tooling

Our security analytics (SA) platform is powered by Elastic, the most recognizable name in open source.

A Partner-Oriented Team

Our team of technical security analysts are highly skilled and qualified with cyber-security domain experience.

SERVICE OVERVIEW

Our Managed Security Services

Managed Cloud Security Monitoring

We provide security monitoring of AWS, Azure and Office 365 cloud environments to ensure your data stays safe while benefiting from the advantages of moving your information and services to the cloud.

Managed Detection and Response

Online's Managed Detection and Response services leverage a combination of technologies deployed at the host and network layers, advanced analytics, threat intelligence, and human expertise in incident investigation and response.

We provide our clients with a team of experts to continually monitor and search through your environment, and quickly detect threats and strengthen your responsiveness.

The Benefits

In addition to improved threat protection from both external and internal threats, Online's MSS Clients benefit from:

Actionable Intelligence - We provide enhanced information on security controls, real-time information, and comprehensive reporting to ensure compliance with various industry regulations.

Enhanced Security Posture - MSS improves your organization's overall security posture by identifying potential threats early, allowing senior leadership to make faster and more effective decisions.

Comprehensive Reporting - We deliver an comprehensive view of all security events and incidents, service delivery, and performance metrics.

Improved Operational Efficiency - Our services provide effective management and monitoring of your security environment with real-time views of efficiencies and inefficiencies of your information security systems that allows you to identify where and how performance can be improved.

Powered by

Managed Vulnerability Scanning

Online's Managed Vulnerability Scanning service extends the value of a one-time vulnerability assessment by providing you with ongoing visibility as part of your information security maintenance program.

We combine vulnerability scanning, identification, assessment, and reporting into a single service offering designed to assist your efforts in reducing vulnerabilities and improving overall information security.
