

Fixed Wireless Broadband

Business Broadband Where Other Carriers Can't Go

Connect to Australia's Largest Fixed Wireless Network

Fixed Wireless Broadband uses microwave technology to deliver high speed business broadband in remote locations and broadband constrained areas. It delivers the service using a mix of fibre and wireless backhubs.

BusinessCom is a CSP (Carriage Service Provider) for Australia's largest fixed wireless network which has a metropolitan and regional footprint, and can deliver symmetrical speeds of up to 1,000 Mbps. Our carrier uses a network of over 200 wireless transmission sites covering more than 5 million residents and businesses.

Superior Bandwidth and Symmetrical Speeds

Symmetrical speeds of up to 1,000 Mbps can be achieved, offering superior bandwidth for even the most demanding network requirements.

Business Grade SLAs and 99.95% Up Time

Business grade SLAs covering service delivery and restoration, with an up-time commitment of 99.95%.

Highly Secure Network and Rapid Deployment

Rapid deployment with low installation costs. High level network security suitable for enterprise business connections.

Low Network Latency

Capable of extreme speeds of up to 1,000Mbps with very low latency meaning minimal delays.

Business VPN

Create a business VPN network utilising a number of wireless connections. Business VPNs can greatly reduce the risk of cyber attacks or security breaches.

24/7 Monitoring and Support

Australian based 24/7 technical support and live service performance monitoring.
