

CRITICAL INFORMATION SUMMARY

INFORMATION ABOUT THE SERVICE

SERVICE DESCRIPTION and KEY INFORMATION

BusinessCom NBN+4G provides asymmetrical high speed internet access via the National Broadband Network and mobile 4G failover where Optus 4G network is available. The service comes with static IP addresses for both the NBN connection and the 4G mobile service, and unlimited data allowance each month. There are no peak and off-peak restrictions, and no excess usage charges. The service is subject to our Acceptable Usage Policy. **Important Conditions:** 4G failover applies only if there is an event of an NBN outage or service fault. It is not to be used in the event of a CPE failure. BusinessCo reserves the right to suspend the 4G failover service if a breach of this usage is detected. The service is not to be used for load balancing or bonding.

INSTALLATION and HARDWARE REQUIREMENTS

If your service connection is non standard, NBN Co will discuss any additional charges with you and these charges will appear on your first bill. You will require a suitable router at your premises for this service to work. If required, we can provide you with a **NetComm NL1901ACV Enhanced Hybrid 4G Failover LTE Gateway for \$240 upfront or \$10 per month over 24 months**. Additional charges apply for on-site NBN Network Gateway installation and replacement. We will deliver your service to the Network Boundary Point at your premises, which is defined as the physical port or 'UNI' on the NBN Network Termination Unit or Port on the NBN Network Gateway if selected. The cabling that is required in your premises beyond the Network Boundary Point is your cost and responsibility, as is the provision of a suitable 240V AC power outlet. Please contact our Customer Service Team for further information. If your premises are rented, you must obtain the consent of the property owner to have the NBN installation performed.

IMPORTANT CONDITIONS REGARDING SPEED

Interface speeds refer to the speed of the technology installed at your premises. They are not necessarily equivalent to the download/upload speeds you will achieve in practice. Actual speeds will be affected by many external factors which include the number of end-users using the service at the same time, the hardware, the software and software configuration, the connection method within the premises and the type/source of content being downloaded. In the case of NBN connections delivered using FTTN (Fibre to the Node) technology, the distance you are away from the node will affect maximum available speeds.

MINIMUM TERM and CONNECTION CHARGES

Minimum term is 12 Months. Standard installation is included at no charge if the service is to be connected in an existing developed area and we can arrange the required installation appointments for you. If you need a first connection in a newly developed area, NBN Co will levy a charge of \$300 and this will appear on your first bill.
