Online Learning at ISM

Fully distanced learning instruction is available for students in grades 1-12. Our online learning program was built to ensure high student engagement and academic integrity, while also maintaining vital connections to teachers and peers.

Scheduled Live Streamed Lessons:

In live streamed lessons, the teacher delivers the lesson using SABIS® interactive content and works with students directly through voice or typed chat. Engaging lessons are taught by teachers using interactive whiteboard materials and mirror the content being delivered to in-person learners. The live-streamed lessons are recorded so that students can access them at any time when necessary.

Regular Assessment:

Weekly assessments are administered in English, math, and science courses for all students beginning in Grade 3. These assessments allow students to demonstrate their progress and understanding of new material. Teachers are able to evaluate learning and ensure mastery of concepts before advancing to the next lesson.

ISM makes instructional adjustments, as necessary, by using formative assessment results to guide the effectiveness of instruction and the next steps of learning through the following:

- Homework participation
- Lesson engagement
- Learning checks done during and/or after the lesson

Tools & Resources

Access To:

- Updated academic overviews
- Detailed schedules and interactive school calendar
- Most recent school news, announcements, and photos
- Homework assignments and resources
- On-Demand Tutoring videos
- Pre-recorded video links

Platforms:

Microsoft Teams is a collaboration app used at ISM to help students stay organized and actively engage in learning. Each ISM student receives an E-mail address to facilitate E-mail, call, and live chat communication with teachers and classmates.

SABIS® Digital Platform (SDP) is a password-protected website and mobile application featuring tools and resources packed with advanced and practical features for students in SABIS® Network schools. SDP allows students to log in and access relevant information tailored to their needs and preferences, keeping them informed, connected, and learning at all times.
