RPL Funding Calculator

Take the complexity out of your apprenticeship pre-enrolment process. With the RPL Funding Calculator, you can recognise prior learning, adjust funding claims and check the viability of applicants online. It's cost-effective, convenient and compliant – you'll have a set process in place to show the ESFA.

Recognise prior learning remotely

Applicants can complete their entire skills assessment remotely. They can rate their prior learning against each KSB in the standard, add comments and upload evidence – like previous qualification certificates.

Create a funding calculator

You can create a funding calculator that outlines the baseline delivery costs of each apprenticeship standard. Input your fixed costs, estimated cost of EPA and your target profit margin, so you know how much funding is left for apprenticeship delivery.

Protect your funding

When the applicant has completed their skills assessment, the funding calculator will automatically reduce your funding claim according to prior learning. It'll only reduce funds allocated for training delivery – your fixed admin costs and profit margin will be protected.

Check the viability of applicants

You can click into each applicant's profile to see if it's viable to deliver the apprenticeship or not. If the minimum course duration has been met and you're going to make a profit, you'll know this is the right learner on the right course.

Evidence-based funding adjustments

When the applicant has completed their skills assessment, the funding calculator will automatically reduce your funding claim according to prior learning. It'll only reduce funds allocated for training delivery – your fixed admin costs and profit margin will be protected.

Save money

Reduce travel and admin costs with remote RPL

Save time

Collect all the RPL evidence you need online

Stay compliant

Create a set process for adjusting funding claims

Protect funding

Only reduce funding that's used for delivery

Guarantee profit

Set and meet your profit expectations

Check viability

See the viability of an applicant at a glance
