

Omnilert Desktop Alert

High-Visibility Alerting
& Cross-Channel App Capability

DELIVERS CRITICAL INFORMATION DURING TIMES OF CRISIS TO THOSE IMPACTED

Omnilert's Desktop Alert ensures critical information reaches those impacted with high-visibility, direct messaging on the devices they use, see and hear.

Now with added advanced capabilities, Omnilert Desktop Alert combines two essential capabilities in one service offering:

Desktop Alerting delivers high-visibility emergency messaging to wall-mounted displays, with full graphical representation, slide-show capabilities and audible alarms.

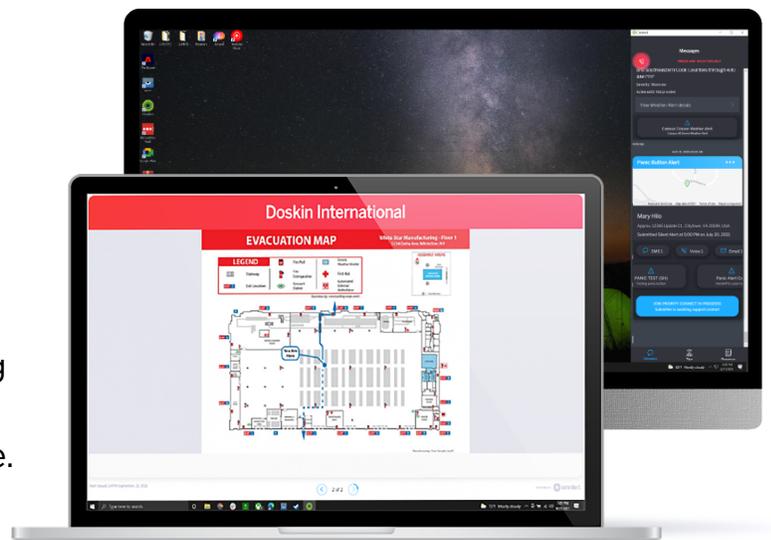

The addition of the Omnilert App onto the desktop allows:

- Emergency notification to reach personal desktop devices and shared desktop screens in use at an organization's site (Library, Reception, Warehouse).
- Vital two-way communication via the App's features, including Priority Alerts, Polling, Tipping, Weather and Panic Button alerts.

A key component of Omnilert's comprehensive Emergency Management Platform, Desktop Alert ensures that messages are distributed and received easily, quickly and to devices that achieve maximum reach.

Your goal is to keep students, employees, customers and guests safe while on-site.

Our goal at Omnilert is to help by providing innovative and preventative solutions that keep people informed so they can stay safe.

Omnilert Desktop Alert Advanced Capabilities

Brings enhanced features and immediate benefits to the delivery of emergency notifications.

Cross-Channel Functionality

One system to manage alerts to two unique channels:

- Desktop and wall-mounted displays for maximum visibility
- Desktops via Omnilert App for greater reach and functionality

Rich Desktop Alerting

Enriched controls allow greater customization of messages and display:

- Text and graphics extend across the full-screen
- Text and graphics easily combine into impactful “slide-show” format
- Audible alerts extend your existing alarm system
- Control of message duration and expiration

Extended Omnilert App Access

Places two-way communication capabilities of the Omnilert App on the desktop:

- Receive native desktop notifications, including Messaging and Weather Alerts
- Request help through the Panic Button
- Access Organizational Resources
- Engage with two-way interactions, including Polling and Tipping

Customized Priority Alerts

Deliver Priority Alerts — Gun Detect, Weather, Panic, Tipping and Custom Alerts, so staff can:

- Receive and respond to Priority Alerts on the desktop
- Send automated response to Priority Alerts, and stay abreast of status
- Segment desktop messaging to select recipients and teams

Simplified Deployment & Management

Now, easier to roll out and maintain subscriptions:

Flexible Deployment:

- Allow IT to drive installation on managed devices
- Invite users to opt-in to installation on their own devices

Simple Assignments:

- Define groups of individual users
- Create groups that reflect Campus/Facility locations (Library, or Lobby Displays)

Easy Admin and Updates:

- Automatic updates (optional) eases maintenance tasks
- Automated removal of inactive seats and remote enablement/disablement via the Omnilert Desktop Alert Device Management UI
- Manage auto-expiry and group targeting within Subscriber Database
