

DANGER ZONE

When cars stacked up at the drive thru lead customers to drive by or drive away.

WACHTER'S SOLUTION

A **high-definition (HD) IP-based camera** monitors the Danger Zone, and provides visual and audio alerts to help you better manage your resources to facilitate an increase in customers.

VALUE AND ROI

Visual Recognition of Stacking Lines:

System includes one (1) wide-angle HD IP camera and two (2) 17" HD monitors located at the cashier booth and food delivery window.

Audio Alerts of Stacking Lines:*

The system not only provides a visual queue, but is capable of providing an audio alert through drive-thru headsets.

Real-Time Reports:

View real-time reports of customer-specific dwell time violations, average dwell times, and more.

Reports are held for 90 days on the camera and can be accessed directly or through separate analytics applications.

Increase Car Counts and Customer Satisfaction:

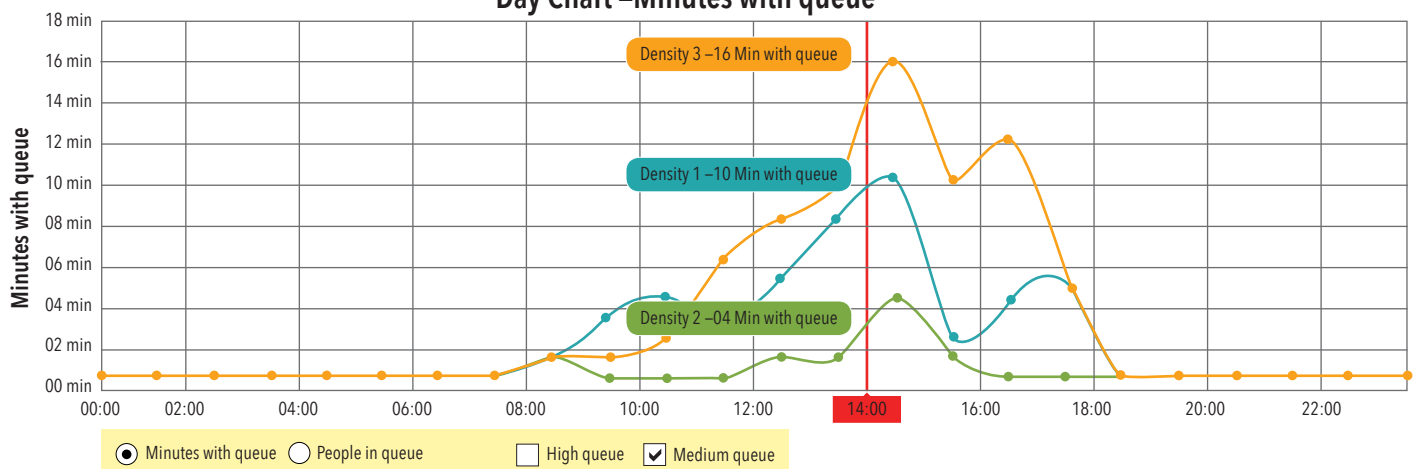

With video / audio queues, managers can efficiently allocate resources to increase car counts and customer satisfaction.

Warranted by Wachter:

Wachter's 24x7 Network Operations Center provides round-the-clock system support.

**Audio alerts / messaging through headsets possible with an advanced danger zone camera.*
