

## INFORMATION GOVERNANCE PLATFORM ENABLES REGULATORY FRAMEWORK COMPLIANCE

OUTCOME: Congruity360 information governance platform replaces a slow, non-compliant patchwork solution with a data neutral, extremely low-latency platform for EU benchmark regulatory compliance.

### THE CUSTOMER

Global financial firm with need to aggregate EU benchmark regulatory-relevant data into time-segmented snapshots.

### THE SOLUTION

Congruity360's information governance platform seamlessly connected to snapshots, scanning all versions and places into a taxonomy. This location in the file structure resides within the platform, allowing for the look and feel of a file share while actually pulling information from the snapshots. This data-neutral approach eliminated a backup instance of the addressed data and ensures the compliance of the entire dataset.
