

RADWELL®

iAlert Monitoring Solution

ZERO UNPLANNED DOWNTIME

Best-in-Class Automated Machine Health Diagnostics

- Eliminate Unplanned Downtime
- Remote Diagnostics
- Improve Productivity
- Improve Safety

i-ALERT®

i-ALERT monitors your equipment. Built in edge computing processes vibration spectrum data to enable in-depth analysis of the equipment health. Get automated vibration analysis and diagnostics through the i-ALERT Ai Platform.

SENSORS

Monitor tri-axial vibration, temperature, run-time hours and pressure

MOBILE APP

Monitor your machine right from your phone with the free mobile app

GATEWAY

Add remote monitoring capabilities by leveraging remote data collection

DIAGNOSTICS

Built in intelligence automatically detects and diagnoses machine issues

Ai PLATFORM

Monitor all of your i-ALERT sensors and machines from a simple web app

EASY TO INSTALL

The i-ALERT can be easily bolted onto the machine, epoxied to the machine with a mounting adapter or magnetically attached. Battery powered for 3-4 years under normal use.
