Changefirst

CHANGE MANAGEMENT TRAINING WITH CERTIFICATION

Get the Change Management skills, digital tools and credibility you need to deliver major change - safely and quickly online.

3 day, instructor-led program for £1,499 In 6 modules. Designed to work around your schedule

✓ **Proven approach to change**

✓ **Work on a "live" project**

✓ **Includes digital tools for change**

✓ **Earn industry recognized certification**

Learn our proven, Forrester-recognized approach

Our programs are built around our PCI® methodology which provides a proven, flexible, people-centred approach to organizational change.

Leverage the insights we have built up over 25 years of real-world application of the methodology and our experience helping organizations to deliver change successfully.

Work on a "live" project & leave with a digital plan

Unlike other programs which take a theoretical approach, our program is a highly practical, "real-world" approach to delivering successful change. Including access to your very own digital change planner.

Our program pre-learning means you also come fully prepared to work on a "live" change project. And you continue to practically apply the concepts and techniques during the program - and leave with a plan you can apply as soon as you are back at your desk.

Online access to powerful diagnostic and assessment tools

We provide all attendees with access to a full suite of **9 multilingual analytics tools** that enable you to assess, track and report on key issues and risks including **change impact and legacy, sponsor performance and engagement and commitment levels**.

All attendees receive 12 months access to our Roadmap Pro® digital platform.
Leverage the experience of like-minded peers

When we ask attendees on our Virtual Change Management Training and Certification for program feedback they consistently highlight - not only the value of story-telling by highly experienced facilitators - but also the added value from sharing challenges, issues and possible solutions with peers.
From individual Change Practitioners and Project Managers to IT professionals.

Highly practical learning you can immediately apply

6 instructor facilitated modules:

- **1.** Preparing for change
- **2.** Getting the leadership right
- **3.** Engaging the organization
- **4.** Preparing for deployment
- **5.** Tracking change progress
- **6.** Completing Certification

All backed up by 40+ learning & application support videos

Every program is facilitated by Change experts

All of our courses are led in an interactive way by highly qualified facilitators with extensive experience of delivering and enabling major change.
