

Connecting Your Field to Office Anytime, Anywhere

Field Team enters time, expenses, project issues, RFIs and change orders

Field Supervisor reviews and approves data

Real-time update to office
for review and approval

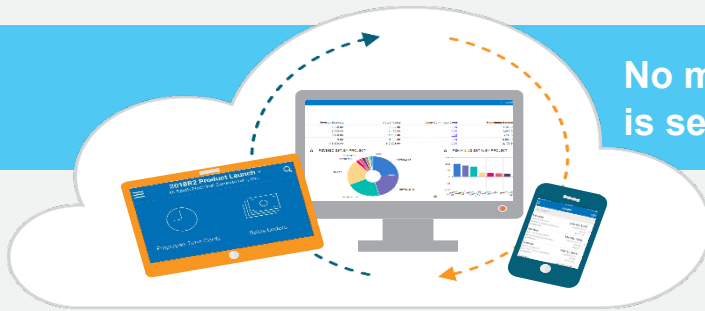

Finance reviews and approves time, expenses, and project costs

Software is updated instantly

No matter where you are, data entered through one device is seen and reported throughout the organization.

Real-time data synchronization through cloud-based mobile construction software allows the entire business to respond quickly and more efficiently.
