

We Are Converting to New Club Software!

One of the reasons we are making this change is to improve the online experience of our members. We look forward to providing a more powerful, modern, and easy to use online system.

We are initially focusing on our in-club roll out, as this change effects many of our club day-to-day processes. We will provide information on how to use the new online function in the near future.

Thanks for your patience as we roll out the system and we apologize for any current inconvenience.

Please contact the club by calling
(507) 282-6000
for assistance during this time.
