

# Industry Solutions

## Insights at Your Fingertips

Analytix's Insight360 delivers customized solutions for a cross section of industries. Our industry solutions combine accounting services with operational tools and applications, easily accessible via a safe, secure technology portal. The combination of these three elements allows business owners to comprehensively analyze data and information, leading to insights that allow for stronger financial and operational management. Our existing Insight360 products were developed to address the challenges of many of our existing clients, so they incorporate metrics and modules that are relevant to the respective industries, yet are customizable to the unique needs of the individual business, practice or property.

## Dunkin' Franchises

As a Dunkin' franchise owner, whether you own one store or multiple stores, the Insight360 Dunkin' solution can help to streamline your required financial and operational practices and reporting. The combined result is consolidated business intelligence on which you can rely to proactively maneuver your franchise to increased profitability and success.

- Automated data pulls from key systems, including Radiant, DCP, CML, Payroll, Drive Thru and GSS.
- Custom reporting built for Dunkin' franchises, including Food and Labor Cost, Waste, Loss Prevention, and crossstore/ district comparisons.
- Applications and tools to increase efficiency and reduce time spent on routine tasks: Weekly 1-on-1

Meeting, Inspections, CML Order Forecast, Daily Forecasting, Bonus Distributions and others.

- Accounting and bookkeeping expertise for the franchise and restaurant industries.
- Intuitive, elegant design, usable on any device.
- Available on a monthly subscription basis without an ongoing commitment.

## Hotels

Our hotel solution was developed specifically with the needs of hotel owners and managers in mind, combining customizable services, advanced technology, and applications and tools, uniquely relevant to hotels, on a single platform.

- Accounting and bookkeeping, from data entry to CFO-level services, tailored for your hotel.
- Critical numbers accessible in one place for any property: Occupancy, RevPAR, ADR, restaurant performance, labor cost, and others.
- Electronic document submission and management increases efficiency and saves time.
- Time-saving apps and tools for routine daily tasks, such as Bill Pay, InsightPay for payroll processing, and restaurant Manager Log.
- Simple, intuitive management portal allows performance data access, at any management level.
- Flexible packages, month-to-month contracts, no set up fees or long term commitment.

## Restaurants

Our services, applications, and tools streamline your restaurant's financials and operations. By confidently accessing important data and metrics, you can gauge performance, with sufficient time to assess the information and make a positive impact on your restaurant's ability to succeed.

- From recording vendor bills to financial statement preparation, we provide a complete solution for your accounting needs.
- Consolidated data for sales, cost, and labor on one easy-to-use portal, is updated daily.
- Restaurant industry-specific metrics, such as weekly Prime Cost, COGS by category and accurate daily labor
- Financial statements available on the portal.
- Tools to streamline daily tasks, such as bill payment and payroll processing.
- Packages are tailored to your needs, with no long term commitment.

## Veterinary

Our veterinary solution integrates the essential data, performance indicators, services, and technology to make your practice run more efficiently and profitably. One integrated platform delivers the business intelligence your practice needs to make more informed decisions quickly and confidently.

- Accurate and reliable accounting and bookkeeping services customized to the needs of your business.
- All key metrics from your Practice Management System, plus payroll and accounting data presented visually and simply on the portal.

- Industry-tailored reports for effective decision making, including new and reactivated clients, cost by category, average invoice by provider, labor cost by category, and more.
