Vendor Management

Create a vendor management program focusing on:

- ✓ Regulatory compliance
- ✓ Mitigation of legal / business / reputational risk
- Require periodic cyber risk assessments / vulnerability scans / penetration tests
- Require employee background checks & training.
- Address roles & responsibilities in breach response.
- Insurance and indemnification language.
- Have a contingency plan to use alternate vendors.
- Document gaps and rank your vendors from best to worst.
- Consider aggregation risk.

Business Interruption Claims

- Waiting Periods – approximate range: 8 to 12 hours
- Period of Restoration – approximate range: 90 to 120 days

Security failure - unauthorized access or use of computer systems & infection by malicious code.

System failure – unplanned & unintentional interruption of computer systems.

Presenting with

BLACKCLOAK

Contingent Business Interruption Claims

Security failure: “Dependent” security failure – usually full limit

System failure:

How is “computer system” defined?

Is voluntary shutdown covered?

Limited to certain types of providers?

- ✓ Non-IT vendors might be sub-limited, some provide full limit (must be scheduled). “Dependent” system failure is usually sub-limited.
- ✓ Broad infrastructure exclusions: ISP , utilities, securities exchanges. Social media platforms?

Wrongful Data Collection & Regulatory Risk

- Regulatory endorsements added / broad policy language
- Regulatory investigations, lawsuits and fines *in the absence of a data breach* may not be covered.
- Some policies are covering “system improvements”: usually require a data breach; may mitigate regulatory claims.
- Many jurisdictions *will not allow* coverage for punitive damages.
