

Quick Start Installation Guide

Standard Edition

Step-by-step instructions to set up your
CZUR ET18 Pro Scanner by ScannX®

What's in the box.

| | | | |
|--|--|---|--|
|  <p>Scanner</p> |  <p>Side Lights</p> | | |
|  <p>Hand Button</p> |  <p>Power Adapter</p> |  <p>Foot Pedal</p> |  <p>USB Cable</p> |

Set up your work area.

- Locate your scanner close enough to your PC for the USB cable to reach it.
- Position the scanner towards the back of your workspace to leave room for the base of the Security Stand.
- Place your scanner away from windows and bright lighting as this can negatively affect scan quality.
- Decide whether to use the hand button or the foot pedal. For book scanning, you'll most likely want to use the foot pedal, keeping your hands free to hold down the pages.

Make your connections.

To connect your devices to the ports on the back of the scanner:

- 1 Plug the USB connector at the end of the hand or foot button cable into the **BUTTON** port.
- 2 Connect the scanner to your PC with the USB cable into the **USBPC** port.
- 3 Plug the power adapter cable into the **DC** socket, and the adapter into a wall outlet.

Scan without the glare.

If you plan to scan glossy materials, the side lights included with the scanner are designed to reduce the glare that results from lighting pages from above.

- Connect the side lights to the socket on the back of the vertical arm of the scanner. They will magnetically click into place.
- When scanning glossy content, turn the side lights ON and the overhead lamp [☀️] OFF.

Power up.

With your PC turned on, toggle the power switch on the back of the scanner to the on position.

Congratulations! You've finished setting up your new scanner hardware.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

 The symbol indicates DC voltage.

RECYCLING: This product bears the selective sorting symbol for Waste electrical and electronic equipment (WEEE). This means that this product must be handled pursuant to European directive.

Questions?

If you run into any issues or just need some help in getting your scanner up and running, please email or call your reseller for support or, if you purchased your scanner directly from ScannX, please contact us. We're ready to help you.
