Let Rego Be Your Guide

ServiceNow Integration Suite for Microsoft 365

Take Advantage of the Workspace for the Modern Team

Powered by **regoLink**

Does your organization use Microsoft Project, Teams, or SharePoint?
Would you like a way to access and use these applications from ServiceNow?

The ServiceNow Integration Suite for Microsoft 365 is ideal for facilitating communication and collaboration in the remote workspace

The ServiceNow Integration Suite Process

On project creation in ServiceNow, your Microsoft SharePoint site is created automatically.

Make updates to your project in ServiceNow and see real-time updates in Microsoft Project.

Create Teams or SharePoint workspace for each ServiceNow project directly from Project. Data is synced automatically.

Built-in Capabilities:

- SharePoint Project Management Office (PMO) site displays real-time project information from ServiceNow
- Search ServiceNow projects or email project director from SharePoint PMO site
- See name, state, project manager, percent complete, and live project status
- View and edit SharePoint documents directly from ServiceNow
- Create Teams or SharePoint workspaces on the fly

Improve productivity and collaboration with Rego's seamless integration for ServiceNow and Microsoft 365
