Apptio Configuration and Adoption Assessment

Achieve a Higher Return out of Your Apptio Investment

Are you getting the most value from your Apptio investment? Is your model challenging to maintain, outdated, or over-customized?

Rego can help. The Apptio Configuration and Adoption Assessment is a low-cost and low engagement assessment that is performed remotely. We quickly identify configuration issues that impede features or performance.

What's Included

- Rego will do a deep dive into your Apptio production environment.
- Review of Data Sources and Allocation Rules.
- Recommendations where returning to out-of-the-box taxonomy will provide the most value.
- Creation of technical debt register, ranked by severity, and recommendations on improving the health of your Apptio platform.

- Discussions of missing functionality.
- Best practice guidance for configuration.
- Review of customizations and alternative solutions will be supplied as needed.
- The engagement will take a minimum of three to four weeks and at least 150 hours. Additional time and effort may be required depending on the number of modules utilized.

Benefits to You

- Identify technical debt and how to reconcile it
- Opportunity to replace over-customization with existing out-of-the-box functionality
- Receive recommendations report that includes best practice guidance
- Roadmap review that includes quick-wins and long-term maturity options

- Alleviate slow performance issues
- Work with Rego guides who are Apptio experts
- Can be performed remotely, without the need for on-site visits
- Achieve a higher rate of return on your Apptio investment
