
UCB

Company description

UCB is a Top 30 global biopharma company, producing drugs for severe diseases in Immunology, Neurology etc. (Neupro, Cimzia, Zyrtec, Xyzal, Briviact), based in Brussels, Belgium.

Project description

Cegeka's team developed 2 web applications, for patients that use 2 of UCB's drugs named "Evenity" (drug for patients suffering from osteoporosis) and "Neupro" (drug for patients with Alzheimer). The apps allow patients registration, and helps them remember when to take their medication, via SMS and E-mail. It also allows doctors to register on this platform, using their pre-existing accounts on third party medical platforms.

Challenges

- Integration with 3rd party platforms for sending SMS's and Emails
- Fully secure environment due to patient data sensitivity
- Globally distributed development team
- Creating a feature on the platforms allowing doctors to register with accounts from other dedicated medical platforms

Team setup

Cegeka deployed a team of 6 people: 4 developers, 1 Scrum Master and 1 Service Delivery Manager.

Types of activities

Software development.

Architecture and technology

Main technologies

.NET, .NET Core, AngularJS, CMS system Drupal, SAP Customer Cloud Data (Gigya), Salesforce, Sendgrid, Twillio.
