Lack of visualization tools

Limited user access

RTG PinPoint Solutions

Data consolidated in a single
platform

Real-time data improves data
integrity

Fully customizable
reporting and filtering
capabilities

User-friendly visualization
tools

Controlled user access via
interactive secure
web-based portal

RTG PinPoint is a web-based reporting platform designed to enable healthcare leadership to effectively and efficiently manage their entire real estate portfolios, based on data-driven insights, and to ensure real estate is aligned with organizational objectives.

- **Advanced Portfolio Metrics**
Quickly understand number of buildings and leases, square footage, occupancy, and lease expirations
- **Property / Portfolio Financials**
View interactive budget vs actual comparisons and identify trends between buildings / markets
- **Property + Facilities Management**
Customizable reporting linked to work order system to understand facilities maintenance activities
- **Project Management**
Track project management information and visualize project status costs, and schedule updates

- **Interactive Mapping + Data Visualization**
Quickly view locations on a map that can be filtered by ownership building type, occupancy, tenant specialty, or lease expiration
- **Dynamic Rent Roll**
Quickly filter portfolio data to find tenant information, lease rollover, specialty mix and other valuable information
- **Other Property Holdings**
Track additional property holdings (e.g., land, parking decks, etc.) in a single platform
- **And More...**
PinPoint is fully customizable... ask us how we can tailor your custom solution
