“STAY HOME, SAVE LIVES”

 **traveloregon** • Following
Oregon Coast

 **traveloregon** Now is not the time to travel far from home — especially to the popular North Oregon Coast. Visitors have been flocking to coastal towns like Astoria, Cannon Beach and Pacific City, creating traffic and making social distancing difficult for locals and visitors alike. Do your part in slowing the spread of COVID-19 to keep everyone safe – and show your love for these communities – by staying local. 📷: @dylanvanweelden

SOCIAL JUSTICE: BLACK LIVES MATTER

traveloregon • Following

traveloregon Black lives matter. The senseless violence and discrimination against Black Americans must stop.

As our nation confronts the realities of its deeply rooted racism and institutional bias, we as Oregonians do as well. The bitter truth is that three separate black exclusion laws were once part of the Oregon Constitution — and discriminatory language was not even completely removed until 2001.

At Travel Oregon, we are committed to upholding the values of human rights, equity and social justice. We realize our complicit role in systemic racism and will advocate for meaningful change in the lives of our staff, partners

ROAD TRIPPING WHILE BLACK IN OREGON

Kay Kingsman, Author
October 9, 2020

When you prepare for a grand road trip, a few questions might run through your head: Is the driving playlist up to date? When was the car's last oil change? Are there enough snacks?

But for BIPOC travelers (Black, Indigenous, people of color), there's another question that might arise: Will I travel through a city that might target me based on the color of my skin? I am an avid road tripper, but after a cross-country experience where I was followed for miles until I had to wait inside a Wal-Mart for them to leave, it is something that I think about every time I prepare for a long drive.

Travel for people of color is dangerous. Even after the abolishment of slavery, violent racial injustice against BIPOC persisted in America through the introduction of Jim Crow laws, Indigenous removal acts, internment camps, Asian exclusion acts and other discriminatory measures. Travel during segregation and beyond has been dangerous because white supremacy is technically upheld by the law.

Travel Oregon's first priority is the safety of our residents and visitors, so we always recommend consulting official resources prior to traveling to ensure access to your destination is safe.

For more information and answers to frequently asked questions, check out this [guide to what you need to know about wildfire season](#) in Oregon.

From relief funds to donation drop-offs to offering your time and services, [here are ways you can help Oregon's wildfire-affected communities right now.](#)

Are there currently wildfires in Oregon?

traveloregon It is not the time to travel right now. Please do not drive to evacuated wildfire areas to look at the damage — it's dangerous and disrespectful to those who have lost everything.

With smoke causing hazardous air quality and poor visibility right now, avoiding going outside is your safest bet (unless you need to evacuate).
