## PROVEN SOLUTIONS IN MAINTENANCE AND RELIABILITY

Proven to Help You Improve  
Performance and Reduce Costs

In your organization, is Maintenance considered “a necessary evil”? Are you tired of fighting the cycle of reactivity where everyday is bombarded with unplanned emergencies that create downtime and other losses? Are you new to the Maintenance role and are trying to put together a strategy for improvement? Attend this course to learn the needed components necessary for a proactive Reliability-Centered culture. Components like roles and responsibilities, real Maintenance Planning and Scheduling, materials management, Maintenance Supervision (not from behind a desk), and much more.

### Why Virtual Interactive Instructor-Led Learning?

- No travel costs incurred
- Interact directly with your instructor
- Have questions answered immediately
- Breakout sessions with peers
- Interactive exercises to enhance learning
- Built-in games to make your learning experience fun

This virtual interactive instructor-led course is NOT just a standard course presented as a webinar. This virtual course is a truly interactive experience that gives you the opportunity to network with your peers through course breakout sessions, built-in exercises and enhanced learning.

**PROVEN SOLUTIONS IN MAINTENANCE AND RELIABILITY**

**POWERFUL SEMINAR**

- The Maintenance and Reliability Best Practices in your organization impact the level of health, safety, environmental, and operational capacity. Do you recognize that upwards of 70% of all failures are self-induced, either from items like poor maintenance practices, operational errors, sales commitments, and so on?
- Interestingly, reliability is not just a Maintenance issue. It takes the entire organization to ensure equipment reliability, not just Maintenance. It takes engineering, operations, purchasing, materials management, sales, marketing, and executive leadership to create a proactive reliability-centered culture. Not only is the cost of unreliable equipment high, there is the cost of those Maintenance resources required to do the work, typically the most expensive hourly employees.
- Are you maximizing their value to the organization? Is the organization effectively planning and scheduling their work to maximize their efficiencies? If you want your operation to enjoy the satisfaction of having all entities pulling in the same direction, rather than pointing fingers in the “blame game”; then this intensive 3-day workshop will help you achieve your goal.
- Designed to help you optimize the value of your maintenance operation, this interactive program will boost your understanding of maintenance and reliability principles, outline the performance roadmap that you need to drive improvements, and equip you with the tools and knowledge to develop a plan of improvement which you can immediately begin to apply on your return to the workplace. within the organization.

**Expect More from People and Processes, Inc.**

People and Processes’ virtual interactive instructor-led courses offer a truly unique learning experience. The virtual interactive environment allows our dedicated practitioners to customize the trainings to fit your needs, while using a hands-on training approach. At People and Processes, Inc. we work tirelessly to provide you with real-world solutions, leading you to be more successful when you put your training into action.
