

Hunger is Often Silent.
So Are Many Who Suffer from It.

### UrbanFootprint can help.

Alleviating America's current hunger crisis requires more than just providing food assistance. It means *targeting* that aid to those most at risk of food insecurity, often silent and missed by outreach efforts.

## Close the gap between assistance and need.

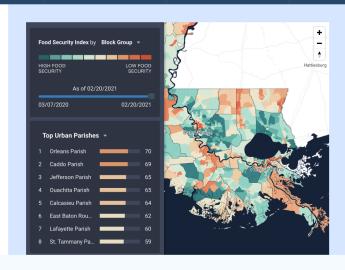

UrbanFootprint Food Security Insights dynamically unifies, analyzes, and maps previously isolated datasets — including key demographic variables — for any area in the U.S. It gives you a clear picture of the most current conditions around food security risk, locating not only the lowest-income and hardest-to-reach households, but also quantifying how many are currently at risk of food insecurity. Knowing exactly where and how big the problem is means you can design outreach programs with greater precision and relevance... and help stave off hunger.

# UrbanFootprint enables you to target assistance to those who need it most.

### Quantify and Map Food Insecurity Prevalence & Risk

- Pinpoint and measure the number of households at risk of food insecurity in any community, with precision down to the census block group level
- Target neighborhoods and households in greatest need of SNAP and other benefits today using frequently updated, dynamic data\*

#### **Enroll More Households in Need**

- Conduct hyper-targeted outreach campaigns to reach the highest-risk households
- Identify communities with the highest concentrations of risk but low rates of SNAP applications

#### **Communicate with External Stakeholders**

- Communicate progress toward strategic goals with customizable charts and maps
- Engage the public and community stakeholders with visually compelling storytelling

## How can we help?

We help agencies target resources to those who need it most. We deploy rapidly and can work with any technology and program management vendor. We provide dedicated technical account management and personalized recommendations to help you reach your goals.
