

Temporary Road Safety Barriers Workshop – online accredited Department of Transport training

This road safety audit training is the only Department of Transport (DoT) accredited training.

Course Information

The aim of this course is to provide participants with the knowledge and skills to select, install, maintain and undertake road safety audits on temporary road safety barrier systems for roadworks.

Learning Outcomes

At the end of this course the participant should be able to:

- explain the basic principles of temporary road safety barrier systems and suitable applications
- identify the different types of compliant barriers and when they are used
- interpret and consider the manufacturers specifications and other requirements when selecting, designing, implementing and auditing temporary road safety barrier systems at roadwork sites
- identify suitable inclusions of a risk assessment that accompanies the selection, design, implementation and auditing of a temporary road safety barrier system and develop practical mitigation strategies
- minimise risk to the public and workers at roadworks sites using temporary road safety barrier systems
- state the contractual and moral obligations.

Trainers

Russell Cyril

(BE(Civil))

Russell is a Director of Trafficworks, a specialist traffic engineering and design consultancy based in Melbourne. Russell manages the traffic management team.
