MEDIA RELEASE

Alexander Funds Wins Best Fixed Income and Credit Fund Award

Melbourne, Australia – The Alexander Credit Opportunities Fund (the Fund) has won the award for Best Fixed Income and Credit Fund at last week's Australian Alternative Investment Awards in Sydney.

This year's award follows five previous nominations for the Fund and wins in both 2013 and 2015.

The Australian Alternative Investment Awards recognises fund managers who are able to produce consistent, competitive risk-adjusted returns independent of the direction of financial markets.

The Fund invests in fixed income credit assets that are generally not available to individual investors, offering regular distributions and low volatility. Despite low interest rates and a flat cash rate, the Fund has managed to achieve, on average, annual returns of more than 6% over the past three financial years and is targeting 5.5% - 6% for the current financial year.

Chris Black, Managing Director of Alexander Funds Management, said "it's great to be recognised for the work we do in order to provide investors with consistent, above-benchmark returns. The Fund has been very successful and we're extremely proud of the results we've been able to achieve".

Over the last few years the Fund has attracted consistent inflows, with over \$200m currently under management.
