

# HOW TO CHANGE YOUR STRINGS

Below you will find Martin's preferred string changing method. This is how we string all of the guitars that leave our factory. We believe this method provides the most stable and consistent playing experience for the life of the strings.

*There is something very special that happens when you change the strings on your guitar for the first time. It's truly the moment that the guitar becomes yours. You breathe new life into it. It's a love that will last a lifetime.*
