

Vision Security Technologies celebrates 20th anniversary

"We want to thank our partners, vendors and most importantly, our Vision team members for allowing us to hit such a tremendous milestone," says founder and CEO Barry Komisar. "We have several partner learning events scheduled throughout the next 12 months of celebration as well as a 20th anniversary security Summit and Gala sometime next year."

Vision is a super-regional electronic security systems integration company headquartered in Birmingham with branch offices in Tuscaloosa, Mobile, and Nashville. Additionally, we have teams based in North Alabama, Montgomery, and Memphis. These strategic assets allow us to give priority response to the critical security needs of our partners in these expanded geographic areas. We specialize in the design, installation, management, and service of fully integrated security systems utilizing the latest available technologies in video surveillance, access control, audio, and intrusion.

Vision Security Technologies was founded in September 2000 as Vision Southeast when Komisar, with an entrepreneurial spirit, a vision, and determination, successfully launched the company in Birmingham. The company has seen tremendous growth over the past several years and is on course to continue that trend.

In 2010, Vision Southeast was rebranded as Vision Security Technologies and moved into a 10,000 sq. ft. facility. Vision is committed to the on-going training of our team members and partners with an on-site dedicated training facility called Vision University and the investment does not stop there. Vision team members travel the US and abroad to learn from and share experiences with subject matter experts. This allows us to bring cutting edge technology and guidance to our partners.

Through vast experience, expertise, and a dedication to a best practices concept, Vision Security Technologies has become a trusted partner and advisor to some of the most notable names throughout the southeast and beyond. We engage across a full spectrum of vertical markets including education, healthcare, government, stadiums and arenas, transit, utilities, industrial facilities, and commercial office.

Award-winning systems and strong partner relationships has helped propel Vision Security Technologies to become Alabama's largest security integrator. The Vision team has grown to just under fifty people and includes key leadership and administrative personnel and support, account and project managers, engineering, and installation/service technicians. Our talented team continues to serve as a major key to our success.
