

RE-OPENING THE WORKPLACE AFTER STAY AT HOME ORDERS

AS EVERYONE GEARS UP TO MAKE PLANS TO REOPEN THE WORKPLACE, we have been talking to many of our enterprise partners regarding a myriad of solutions to help keep your employees safe and mitigate liability. An essential key to your Duty of Care obligations for employees and visitors requires you to provide a safe and secure environment. Solutions from VISION Security Technologies enhance your security and your workplace.

ENTRY VERIFICATION SOLUTIONS

- Validates both employees and visitors
- Pass/Fail temperature monitoring cameras
- Hand-held thermometer portable
- Kiosks and turnstile integrated access
- Vehicle occupant scanning before entry is granted
- Visitor management integration with health questionnaire and testing
- Mobile phone verification with credential

MULTI-FACTOR DOOR ENTRY SYSTEMS
temperature, mask, face with wiegand output

TOUCHLESS SOLUTIONS

Provides non-contact devices for safety

Remote entry with mobile access or Audio/Visual intercoms eliminating direct contact or guards.

Touchless entry doors can be integrated using access control features

Mobile credentials using blue diamond or HID mobile readers allows people to unlock doors while maintaining social distancing

Biometric tools using face detection, iris scanning and mask detection

VIDEO MANAGEMENT SYSTEMS

a force multiplier to enforce policies and social distancing

Social distancing analytic allow alerts or can integrate with directional signing based on people density

Appearance search can determine where specific individuals have been and identify others which may have had exposure

Thermographic cameras a stand-alone option

Mask detection analytics sets alerts and captures metrics

ACCESS CONTROL

Provides a comprehensive data platform for integration including audits of access to the facility

Integrate sensor data input pass/fail fields, time stamp of entry

Camera verification video and video analytic notification or alarm

Visitor management integrates visitor verification, audit and compliance data

Breach audit Ability to identify critical locations where a suspected carrier has been in the building

Blocked person blocks cardholder or visitor from accessing a specified location

Proximity reporter provides the ability to track access for cardholders or visitors
