

## THE POWER OF iGRAF X IN THE CLOUD

iGrafX Origins is a business process management (BPM) collaborative platform that delivers all the functions you need to achieve process maturity and digital transformation: easier modeling, powerful reporting and dashboards, process automation, risk management, governance and much more – all integrated into a single solution for company-wide accessibility.

With the iGrafX Enterprise Cloud to access iGrafX Origins, you avoid complex IT setup efforts as well as significant initial and ongoing capital costs. Our SaaS solution provides secure access to the most trusted process-centric business modeling platform in the world. In the office, at home or on the road, use any browser for SSL-encrypted access to the iGrafX Origins platform.

### Effortless Deployment

While on-premise solutions require an upfront IT assessment to determine potential operational impacts prior to deployment, the iGrafX Enterprise Cloud can be easily accessed without any risks to your existing environment. The iGrafX Enterprise Cloud is the best tool for modeling business processes, and you can start right away. No hardware or hosting costs. No need to install or administer anything. No need to involve internal IT resources. Just provide user information and let iGrafX do the rest.

### How secure is the iGrafX Enterprise Cloud?

The iGrafX Enterprise Cloud is rigorously tested and offers broad protection. If you think on-premise deployments are more secure than SaaS, you might want to reconsider. Most experts these days feel the cloud is safe than on premises. At iGrafX, our experts work constantly to implement updates and monitor the applications to minimize vulnerabilities. We provide secure authentication options as well as single sign-on (SSO) integration, encrypted browser communication, and we separate your application and databases from other customers. Your data is securely encrypted, backed up, and distributed geographically to prevent any losses. However, we ensure your data remains local to your designated geographical region (with the added flexibility to go global, if needed).

iGrafX has been a trusted Microsoft Gold Partner for over 20 years. We built the iGrafX Enterprise Cloud in Microsoft Azure in a state-of-the-art environment constantly monitored to protect your data and privacy. The solution is currently hosted in the USA, Germany, UK and Japan, with a growing list of additional locations.

### Productivity for a Mobile, Global Workforce

Businesses today have an increasing number of widely dispersed employees with the need to leverage centralized data. The iGrafX Enterprise Cloud gives you instant browser access from anywhere, anytime, making it easy to collaborate and gain efficiency across the teams. And as you grow and increase users, your administrators don't need to manage the scaling of systems, iGrafX does it for you.

### Benefits of the iGrafX Cloud:

- **High Scalability:** as your business grows, it's easy to expand the services you subscribe
- **Outstanding Security:** via cloud data centers in your geographical region, managed by experts
- **High Stability:** through redundancy and continuous monitoring
- **Cost Effective:** pay-as-you-go model with minimal IT investment (if any at all)
- **Flexibility:** we ensure your deployment is compliant with your IT requirements without burdening your IT department with ownership of the infrastructure
- **Simplicity:** global access to central process data through your browser
- **Free updates:**
  - No additional maintenance fees
  - iGrafX software updates are included at no cost
  - iGrafX handles the installation of new versions when you are ready.
  - No local servers or server updates required

### iGrafX Dedicated Cloud is reliable and secure:

- SSL encryption
- Strong security authentication
- Single Sign-On (SSO)
- Active Directory (AD) integration
- Backups with point-in-time restoration
- Data Encryption

## Optimised ROI & Dependable Support

The iGrafx Enterprise Cloud allows you to avoid a large upfront investment in hardware, datacenters, network, IT projects, and administration. Our SaaS subscription allows you to pay-as-you-go, growing your footprint as needed at your own speed.

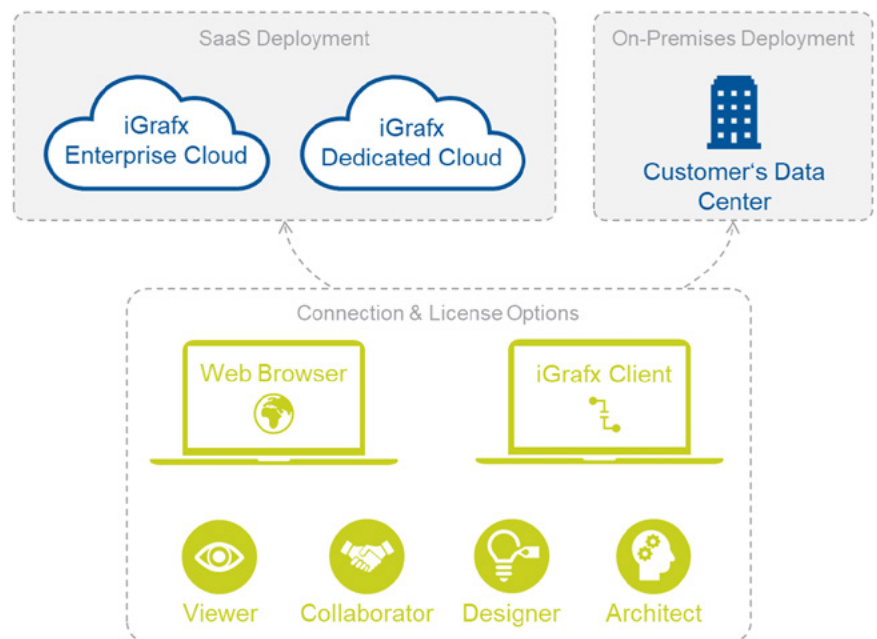

Supporting internal users can be an expensive exercise. With the iGrafx Enterprise Cloud, there's no need for IT to be trained on iGrafx solutions or spend precious time supporting end users. When deployed with iGrafx Superior Technical Support, users can contact iGrafx support directly with issues or questions, freeing up your internal IT resources to work on more strategic projects. In addition, there's no need to worry about server hardware administration or maintenance, backup management or application and database configuration. We keep you on the latest version of our software at all times. iGrafx has you covered.

## Beyond the Cloud

Have users who prefer desktop clients? If so, you can continue to use the installed desktop client and seamlessly access your information in the process repository available in the cloud.

## Want to try iGrafx for free?

iGrafx offers free trials. Start your trial today and experience the power of iGrafx functions and tools in the cloud. Contact us to discuss the system setup and configuration that best suits your needs. Beyond the Cloud

## Looking for a Jump Start with iGrafx?
