License Model VCDA

iGrafx®

THE POWER OF iGRAFX IN SIMPLE, PERSONA-BASED LICENSING

Owning and using iGrafx has never been more simple. With our 25+ years of experience in BPM, we understand the nature of the roles involved in ensuring BPM success. That is why our licensing reflects the four major personas who are involved in BPM solutions: Viewers, Collaborators, Designers and Architects. Or VCDA for short.
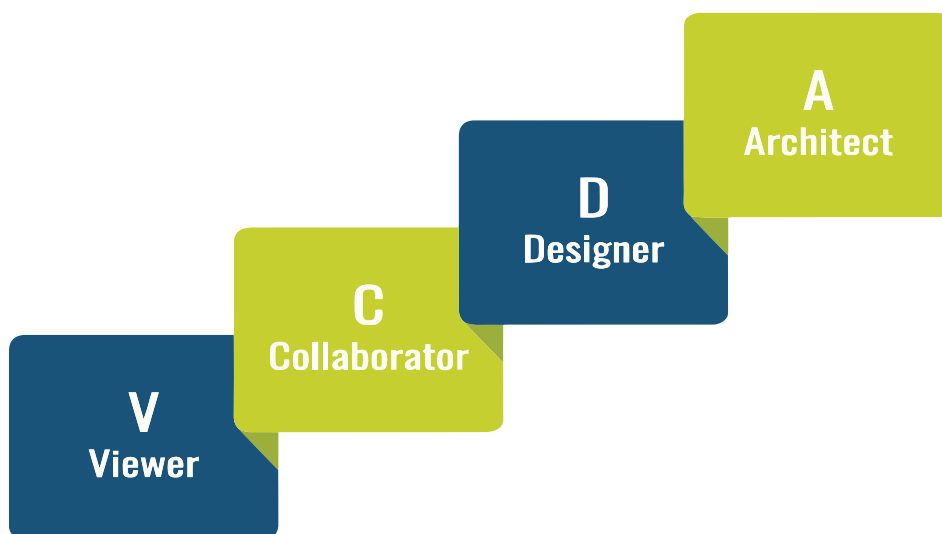

"Viewers" are the front line people who perform processes. They need to know what's expected of them...what to produce and how. They need to find the approved process and procedural documentation quickly and easily, acknowledge they understand it, and then get on with their work.

"Collaborators" are executives, process owners and experts who are accountable for the work being done. They may provide supporting documentation or be called upon to approve the documents others see. They need consolidated information and process visibility across their organization.

"Designers" are the process authors who are experts at building process diagrams, executing process improvement projects and ensure the documentation approved by the collaborators and seen by the Viewers is current and accurate. They need diagramming and analysis tools that ensure project success and improved business performance.

"Architects" are the business experts who create the end-to-end views of the enterprise and define the pieces the 'Designers' take ownership of. They create the frameworks and reusable objects of the solution that drive the enterprise model. They need a unified transformation planning, impact analysis and reporting tool that gives them the insights they need to plan the transformation of the business.

VCDA forms the backbone of the entire iGrafx environment, consistently delivering the right functionality to the right users at the right time. Deployment and connection options ease access and ensure IT compliance.

iGrafx is ideal for organizations engaged in:

- Business Process Improvement
- Business Process Management
- Process Optimization
- Business Transformation
- Risk and Compliance
- Performance Management
- Quality Management

Achieve Operational Excellence through:

- Process Diagramming and Governance
- Model-based Analysis
- Business Transformation
- Risk Mitigation
- Performance Management
- SAP Optimization

Powerful Components and Extensions:

- Core Platform for Web Diagramming, Collaborative Process Management and Business Transformation
- Performance Management
- Risk Management
- Process Automation
- SAP Optimization

iGRAFX PLATFORM

Compatibility	(V)iewer	(C)ollaborator	(D)esigner	(A)rchitect
Connect iGrafx Client with iGrafx Platform (FlowCharter, Process or Process for Six Sima) [1]	✔	✔	✔	✔
View Approved Documents & Diagrams	✔	✔	✔	✔
Endorse Approved Documents & Diagrams [2]	✔	✔	✔	✔
View All Enterprise Objects, Dashboards & Reports	✔ [5][6]	✔	✔	✔
View & Create Diagram Comments	✔ [5]	✔	✔	✔
Review or Approve Documents & Diagrams		✔	✔	✔
Add and Update non-iGrafx Documents (e.g. PDF, DOC, PPT, etc.)		✔	✔	✔
Create & Edit Web Address Objects		✔	✔	✔
Check-out & Check-in Client Documents & Diagrams		✔	✔	✔
Start & Schedule Review, Approve & Endorse Cycles		✔	✔	✔
Create, Edit, & Manage Web Diagrams [8]			✔	✔
Propose New Enterprise Objects From a Web Diagram [4]			✔	✔
Create & Edit Resource, Glossary & Term Objects			✔	✔
Create & Edit Dashboards & Reports			✔	✔
Create & Edit All Enterprise Objects (not requiring a Module) [3]				✔
Create Enterprise Objects From Web Diagram Proposals [4]				✔
Create & Edit Diagram Shape Libraries				✔

(1) iGrafx FlowCharter, Process and Process for Six Sigma are Desktop Clients installed separately from the Platform.

(2) Web Diagrams are individually Endorsed, Reviewed, and Approved via Cycle Management. Client diagrams are contained in .igx documents which are Reviewed, Approved, and Endorsed.

(3) Objects that can be edited without a module are: Strategy, Goal, Requirement, Process, External Agent, Resource, Interface, Service, Operation, Work Product, Class, (Web-authored) Diagram, Client-authored) Document containing Diagrams, Shortcut, Glossary, Term, Dashboard, Report, Shape Library, Web Address, Journey, Moment, Touch, Product, Business Service and Capability (7)

(4) 17.4 and later

(5) 17.4.1 and later

(6) Viewers can only view Approved objects

(7) iGrafx Cloud 17.6 and later

(8) Journey Map Diagrams require the iGrafx Cloud(7)

The iGrafx PRC Module enables both Performance and Risk Management capabilities with iGrafx.

iGrafx PRC (Performance, Risk, Compliance) Module				
Compatibility	(V)iewer	(C)ollaborator	(D)esigner	(A)rchitect
View PRC Data Values Displayed in Diagrams	✓	✓	✓	✓
Edit PRC Data Values		✓	✓	✓
Create & Edit Charts & Tables			✓	✓
Create & Edit PRC Objects (Risks, Controls, KPIs, Opportunities) [7]				✓

The iGrafx Automation Module enables the creation, deployment and participation in automated workflows designed in iGrafx.

iGrafx Automation Module				
Compatibility	(V)iewer	(C)ollaborator	(D)esigner	(A)rchitect
Participate in Automation Workflow	✓	✓	✓	✓
Edit Automation Properties			✓	✓
Deploy Process to Automation			✓	✓

The iGrafx SAP Module enables integration with SAP Solution Manager and the visualization and editing of SAP Solution Manager objects in iGrafx.

iGrafx SAP Module				
Compatibility	(V)iewer	(C)ollaborator	(D)esigner	(A)rchitect
View SAP Enterprise Objects Displayed in Diagrams	✓	✓	✓	✓
Describe SAP Objects in Diagrams			✓	✓
Create & Edit SAP Objects				✓

The iGrafx Integration API Module enables access to the iGrafx REST APIs.

iGrafx REST API Module				
Compatibility	(V)iewer	(C)ollaborator	(D)esigner	(A)rchitect
Use the REST API to interact with the application in an automated fashion	✓	✓	✓	✓
