

THE WORLD'S MOST TRUSTED BPM PLATFORM

iGrafX Business Transformation solutions empower organizations to achieve maximum performance today. Powered by Process Knowledge Management, they can transform for the digital of tomorrow and define continuity and resiliency plans for whatever disruptions may come.

The iGrafX Business Transformation Platform provides the foundations for business transformation through process knowledge capture and collaboration, ensuring transparency and understanding of the processes and procedures necessary at all levels of the organization, as well as the underlying business architecture required to ensure operations run smoothly and effectively manage change.

Modules

Increment the capabilities of the collaborative platform by adding progressive functionality:

- **PERFORMANCE RISK & COMPLIANCE (PRC):** delivers powerful functionality capturing and scoring business risks and associated controls. Gain valuable insight through robust modeling and reporting into how effective your risk mitigation efforts are across your enterprise as you prepare for regulatory and other audits. Additionally, performance dashboards provide a real-time window into your company's process behavior and operational effectiveness, helping your organization to react with speed and effectiveness.
- **RPA Accelerator:** provides a standardized method of analyzing and prioritizing processes for possible automation based on complexity, cost, and strategic alignment. Once deployed, reporting clearly shows where automation is at work within your enterprise, what processes it supports, the systems and data that are accessed, and performance monitoring to ensure your digital workforce is providing the intended efficiencies and ROI.
- **AUTOMATION:** provides business groups the agility and control to deploy efficient workflows. Create reliable, repeatable processes that reduce costs and lead times, and maintain transparency into process performance so participants can quickly adapt to change.
- **SOR INTEGRATION:** When it comes to integration, the iGrafX platform can interconnect with the variety of business tools and systems of record that hold data. For example, iGrafX provides integrations with SAP SOLMAN and the Blue Prism to provide governance and visibility of where these technologies are used within your process architecture and to help ensure alignment and reduce cost. Regardless of your system of record, the iGrafX services team can help with an integration that works for you.
- **EXPERT ANALYSIS TOOLS:** take your process modeling to the next level of analysis with Lean Six Sigma tools and powerful 'What-If' simulation capabilities.

iGrafX is ideal for organizations engaged in:

- Process Knowledge Capture and Retention
- Operational Excellence
- Quality Management
- Governance Risk & Compliance
- Continuity & Resiliency
- IT Services Management
- Performance Management
- Digital Transformation
- Workflow Automation
- Customer Experience

iGrafX Process Knowledge Management Platform Provides:

- Accessibility and transparency of embedded processes and procedure knowledge
- Ability to Capture and Define Processes and Procedures
- Tools for expert Lean Six-Sigma and What-If Analysis
- Automated workflows
- A reusable business architecture model

These capabilities enable:

- Alignment of Customer Journeys to Business Process and Supporting Architecture
- A Governance Model for Organizational Accountability and Transparency
- Scorecards and KPIs for Performance Monitoring
- Process-based Risks and Controls for Compliance
- RPA assessments aligned to strategy

DEPLOYMENT AND CONNECTION OPTIONS EASE ACCESS AND ENSURE IT COMPLIANCE

iGrafx's flexible deployment options allow you to choose where your software is deployed and who manages the infrastructure:

- **iGRAFX ENTERPRISE CLOUD:** The fastest, easiest, simplest way to start using iGrafx to solve your business needs. Stood up and ready as soon as you are. Enjoy a secure, enterprise-class environment that takes care of the infrastructure for you, allowing you to focus on your improvement efforts, while always ensuring you are on the latest and greatest version of iGrafx.
- **iGRAFX DEDICATED CLOUD:** Our Enterprise offering that gives you the ability to control the environment, including which version of iGrafx you are using. This flexibility allows for planned change management and roll out of new functionality according to your schedule.
- **iGRAFX DATACENTER:** Deploy iGrafx in your IT environment or private cloud. We will work with your IT resources on installation and planned upgrades as your use of iGrafx expands.

iGrafx connection options give you all multiple access channels to your process data:

- **WEB BROWSER:** iGrafx is a modern, fully enabled web application that delivers unparalleled performance and accessibility. No client installations are necessary to get all the benefits of the entire iGrafx suite.
- **iGRAFX CLIENT:** For Lean / Six Sigma experts who require robust analysis tools, the iGrafx desktop client can be used to connect to the platform and ensure all your process documentation and analysis is kept in your process repository. This expert analysis tool is installed and run on your analyst's computer.

Looking for a Jump Start with iGrafx?

Leverage our expertise for a higher ROI. Our training and consulting services can help you apply the power of iGrafx even faster. For more information, please visit iGrafx.com/services.

iGrafx works with the Global 2000 with a focus on large, complex challenges, high degree of regulatory requirements, and the need for continuous business improvement.
